BEFORE YOU START	

How to use this manual

This is not a book to read. It is a book to be tested by. Reading feels productive and teaches almost nothing; retrieval is what sticks. So on nearly every page you will be asked a ques-

tion before you are given an answer. Cover the answer, attempt it aloud or on paper, and only then look.

The whole of TMC221 is five lecture decks. This manual carries **every idea, name, number, definition and acronym** in those decks, and then it **tests each one** in the exact styles the real test uses. Nothing from the slides is left out, and nothing is tested as a vague essay: every fact is drilled as a specific, checkable question.

The boxes, and the one job each one has

TEACH

One idea, in plain words. When a box like this appears, a single concept is being explained. Read it once, then expect to be asked it back.

● MUST MEMORISE

GOLD = MEMORISE

The gold box is the reserved colour of this manual. It appears nowhere else. Every gold box holds something you must be able to recall word-for-word, and each one ends with a memory hook.

◆ **MEMORY HOOK: GOLD IS THE NUGGET. IF IT IS GOLD, LEARN IT COLD.**

The five drill boxes below mirror the five question styles of the real CBT exactly. Learn to recognise them by colour, because in the exam you must switch between them at speed.

FILL IN THE GAP

TYPE ONE WORD

A sentence with a _____ to complete from memory. The exam calls these "gap-fill" or short-answer. Answer, then lift the rule.

ANSWER the missing word or phrase sits here.

MATCH-UP

PAIR THEM

A left column of items and a right column of labels; join each to its correct partner. The exam uses dropdowns; here you draw the line in your head, then check.

PICK

CHOOSE THE ANSWER(S)

Multiple choice. A round marker means **pick one**. A square marker means **pick all that apply** (there are usually two right answers). The wrong options are the exact traps the real test uses, so study why each wrong one is wrong.

TRUE OR FALSE

DECIDE

A single statement to judge. These punish the reader who "sort of" knows a definition, because the false ones are true-sounding. Decide, then check and read the reason.

CLOZE SCENARIO

COMPLETE THE STORY

A short scenario with several blanks, each filled by choosing the right continuation. This is the exam's heaviest question type: one scenario can carry four separate marks. Complete every blank.

⚠ TRAP

The exact mistake the exam is built to catch: the plausible wrong answer, and why it is wrong. Every trap here was lifted from a real distractor.

RECALL AND CHECK

A quick retrieval question. What should you do the instant you finish reading a box?

ANSWER Cover it and say it back. If you cannot, you have not learned it yet, you have only met it.

A small dark chip like **L1 S4** marks which lecture and slide a fact comes from (here, Lecture 1, Slide 4). A red chip like **TEST Q6** marks a question taken from the real TMC test. Use the chips to trace anything back to its source.

ORIENTATION

The course at a glance

Five lectures, one exam. Here is the whole territory on one page, and the exact shape of the test you are preparing for.

The five lectures

LECTURE	TITLE	THE BIG IDEA	NAMES AND MODELS TO KNOW
1	Goal Setting and Personal Accomplishment	Turn wishes into structured goals, then run them with proven frameworks.	SMART+ER, OKR, 12-Week Year, Implementation Intentions, WOOP, the 4-Layer Goal Stack
2	Positive Thinking and Creative Problem-Solving	One framework, the W.I.S.E. Model, built from five authors across five decades.	Oyedepo, Leaf (SWITCH), Peale, de Bono (lateral thinking), Young (5-step ideas)
3	Personal Branding and Strategic Positioning	Build the inside first, then package and position it so you are remembered.	Self-Audit, Brand Pillars, Packaging, Positioning, Niche, Brand Bank Account
4	Systems for Sustainable Success	Success runs on a system: seven interlocking "Kits", all beginning with T.	Task, Training, Target, Tools, Timing, Tillage, Tarrying
5	Overcoming Discouragement and Sustaining Personal Success	What to do on the day you want to stop: grit, vision, three pillars, four strategies.	Grit (Duckworth), the 50th Blow, Dream against Vision, the Three Pillars, the Precision Test, the 1% Rule, Dweck's mindsets, RESIST, GUARD YOUR JOY, PERSEVERE, SPEAK YOUR DREAM, the 7-Step Plan

One thing to know about Lecture Five. The lecturer released it after the real TMC test had already been sat, so not one question in the worked test comes from it. That is a warning, not a reprieve: it means the test in this manual under-represents a fifth of your syllabus. The three mock papers correct the balance and each carries a Lecture Five section, and Module Five drills every one of its slides.

The exam, exactly as it comes

The test is a computer-based quiz. Each question is tagged with the lecture it comes from and is **marked out of 1**. There are five question styles, and this manual drills all five:

STYLE	WHAT YOU DO	WATCH FOR
Single MCQ	Choose one of four options.	Two options are close; one is exactly right.
Multiple response	"Select all that apply", usually two correct.	Miss one and you may lose the mark.
Matching	Pair each item with its label via a dropdown.	Labels are near-synonyms; know the precise term.
True / False	Judge one statement.	False statements are deliberately true-sounding.
Cloze	Complete a scenario with several dropdown blanks.	Each blank is its own mark; finish them all.

● MUST MEMORISE

THE GOLDEN RULE OF THIS TEST

This test does not reward opinions or general life advice. It rewards **the exact wording and the precise distinction from the slides**: an activity is not a Key Result, fear is replaced not managed, a niche is a launch pad not a limitation, a vision is not simply a bigger dream. When two answers feel right, the exam wants the one that matches the slide.

◆ **MEMORY HOOK: THEY TEST THE SLIDE, NOT YOUR GOOD SENSE. ANSWER THE SLIDE.**

How to work through this manual

1. Read each Teach box once, then cover it and say it back.
2. Do every drill honestly, answer first, check second. A drill you read the answer to is a drill wasted.
3. Learn every gold box cold, hook and all.
4. Study the Traps: the exam is built from exactly those wrong answers.
5. When the modules are done, sit the fully worked real test, then the three mock exams under time.
6. Finish on the Master Cram Sheet the night before.

MODULE ONE

Goal Setting and Personal Accomplishment

Proven frameworks for turning ambition into achievement. You will learn to tell a real goal from a wish, and to run goals with four frameworks that each fix a different reason goals fail.

What a Goal Really Is

Most people never miss their goals. They simply never set any. They live in wishes and dreams, which feel purposeful but ask nothing of them. This unit draws the exact line between a wish and a goal, and names the one kind of goal that actually changes you.

TEACH: WHAT THIS MODULE TRAINS

L1 S3

By the end of Lecture 1 you should be able to do four things: **distinguish** between wishes, dreams, intentions, and properly structured goals; **apply** at least two evidence-based goal-setting frameworks to your own life; **identify** the psychology behind achievement and why goals fail; and **build** a personal goal architecture using proven modern strategies. Every one of those four is drilled below.

TEACH: CLARITY IS THE DIFFERENCE

L1 S2

Two roommates in 2008 each wrote about their futures. One wrote, "I want to be successful." The other wrote a precise plan: a named certification, an NGO role, and a specific sum saved, all by a specific date. By 2012 the second had done all three; the first was still writing the same sentence. The difference was not intelligence, family background, or luck. It was **clarity**.

"The indispensable first step to getting what you want is this: decide what you want." **Ben Stein**

TRUE OR FALSE

L1 S2

In the story of the two 2008 roommates, the one who succeeded did so mainly because of a superior family background and good luck.

ANSWER **False**. The slide is explicit: the difference was **not** intelligence, background, or luck. It was clarity, the second roommate wrote a specific, dated, measurable plan.

FILL IN THE GAP

L1 S2

Ben Stein: "The indispensable first step to getting what you want is this: _____ what you want."

ANSWER decide.

The four levels: not every aspiration is a goal

TEACH: WISH, DREAM, INTENTION, GOAL

L1 S4

An aspiration climbs through four levels. Only the fourth is a goal.

LEVEL	EXAMPLE	THE PROBLEM WITH IT
Wish	"I want to be rich"	No direction or deadline
Dream	"I want to own a business someday"	Indefinite timeframe
Intention	"I plan to start saving this year"	No commitment or measure
Goal	"I will save a set sum monthly for 6 months from Jan 1st"	Specific, measurable, time-bound

Most people live in the wish and dream layers, which feel purposeful without requiring anything of them. A real goal is a **declaration with evidence**: what will happen, when, and how you will know.

● MUST MEMORISE

L1 S4

The key shift that turns an aspiration into a goal: move from **"I want"** to **"I will, by [date], measured by [evidence]."**

◆ **MEMORY HOOK: A GOAL HAS A DATE AND A RULER. NO DATE, NO RULER, NO GOAL.**

MATCH-UP

L1 S4

Match each statement to its level.

STATEMENT	LEVEL
"I want to own a business someday"	Dream
"I want to be rich"	Wish
"I will save monthly for 6 months from Jan 1st"	Goal
"I plan to start saving this year"	Intention

CHECK Wish = no direction or deadline; Dream = indefinite timeframe; Intention = no commitment or measure; Goal = specific, measurable, time-bound.

FILL IN THE GAP

L1 S4

A real goal is a declaration with _____: what will happen, _____, and how you will know.

ANSWER evidence; when.

The three types of goal: only one actually changes you

TEACH: OUTCOME, PROCESS, IDENTITY

L1 S5

Goals come in three types, ranked here by lasting power.

TYPE	IT ANSWERS	EXAMPLE	THE VERDICT
Outcome	What you want to achieve	"Win the department prize"	Motivating but outside your daily control. Useful for direction, dangerous alone.
Process	What you commit to doing	"Study four hours every weekday"	Fully within your control. The daily engine of achievement.
Identity	Who you are becoming	"I am the kind of person who shows up consistently"	When the goal becomes your identity, behaviour follows without negotiation.

The student who *is* disciplined outlasts the one who *wants* to be.

● MUST MEMORISE

L1 S5

Of the three goal types, the **Identity goal** is the one that actually changes you, because when the goal becomes who you are, behaviour follows **without negotiation**. Process goals are the daily engine; outcome goals only set the direction.

◆ **MEMORY HOOK: OUTCOME POINTS, PROCESS PUSHES, IDENTITY /S. BECOME, DON'T JUST WANT.**

PICK ONE

L1 S5

"Study four hours every weekday." Which type of goal is this?

- ☐ a An outcome goal, because it aims at success
- ☐ b A process goal, because it is what you commit to doing and is within your control
- ☐ c An identity goal, because it describes who you are becoming
- ☐ d A wish, because it has no deadline

ANSWER **b**. A process goal names a controllable daily action. "Win the prize" would be an outcome goal; "I am someone who shows up" an identity goal.

△ TRAP

L1 S5

Outcome goals feel like the "real" goals because they name the prize. The trap: an outcome goal is **entirely outside your daily control** and is dangerous when relied on alone. The exam wants you to know process and identity goals are what carry you, not the outcome.

MATCH-UP

L1 S5

GOAL TYPE	WHAT IT IS
Outcome goal	What you want to achieve (outside daily control)
Process goal	What you commit to doing (the daily engine)
Identity goal	Who you are becoming (behaviour follows automatically)

TEACH: REWRITE IT AS AN IDENTITY

L1 S6

The Lecture 1 exercise: take one goal you are pursuing, name its type, then rewrite it as an identity goal beginning **"I am becoming the kind of person who..."** The re-write lands differently because it changes who you are, not just what you chase.

FILL IN THE GAP

L1 S6

To rewrite any goal as an identity goal, begin it with the words: **"I am becoming the kind of _____ who..."**

ANSWER person.

RECALL AND CHECK

Name the four levels of aspiration in order, and the three goal types in order of lasting power.

ANSWER Levels: wish, dream, intention, goal. Types (least to most lasting): outcome, process, identity.

MODULE ONE · UNIT 2

Four Frameworks That Work

These four frameworks are a toolkit, not a menu to pick one from. Each one solves a different reason goals fail: no structure, no evidence, no urgency, or no trigger to act.

TEACH: FOUR FRAMEWORKS, FOUR FAILURES

L1 S7

#	FRAMEWORK	THE PROBLEM IT SOLVES
1	SMART+ER	Goals that lack structure and emotional connection
2	OKRs	Ambition with no measurable evidence of progress
3	12-Week Year	Annual planning that destroys urgency
4	Implementation Intentions	Motivation without a trigger to act

MATCH-UP

L1 S7

FRAMEWORK	PROBLEM IT SOLVES
SMART+ER	No structure or emotional connection
OKRs	Ambition with no measurable evidence
12-Week Year	Annual planning that kills urgency
Implementation Intentions	Motivation with no trigger to act

Framework 1: SMART+ER

TEACH: SMART, PLUS TWO LETTERS

L1 S8

SMART+ER keeps the five familiar letters and adds two that fix its fatal weakness, that a plain SMART goal can be abandoned by week two for want of emotional connection.

LETTER	MEANING	THE QUESTION
S	Specific	Exactly what will you do or produce?
M	Measurable	What number proves you succeeded?
A	Achievable	Is this a genuine but realistic stretch?
R	Relevant	Does this serve your bigger purpose?
T	Time-bound	What is the exact deadline?
+E	Exciting	Would you pursue this without anyone watching?
+R	Reviewed	When exactly will you check progress?

E is internal fuel; R builds in accountability. A goal without a review schedule is a wish with an expiry date.

FILL IN THE GAP

L1 S8

In SMART+ER, the extra E stands for _____ and the extra R stands for _____.

ANSWER Exciting; Reviewed.

PICK ONE**L1 S8**

Why does SMART need the extra "E" (Exciting)?

- ☐ a Because exciting goals are easier to measure
- ☐ b Because without emotional connection a SMART goal can be abandoned by week two; E is the internal fuel
- ☐ c Because excitement replaces the need for a deadline
- ☐ d Because it makes the goal achievable

ANSWER **b.** The "+E" question is: would you pursue this with no one watching?

FILL IN THE GAP**L1 S8**

"A goal without a review schedule is a _____ with an _____ date."

ANSWER wish; expiry.

Framework 2: OKRs, ambition meets evidence

TEACH: OBJECTIVE + KEY RESULTS**L1 S9**

Objectives and Key Results (OKRs) have been used by Google since 1999. An OKR has two parts.

1. **Objective:** one bold, inspiring, *qualitative* statement. It answers "Where am I going?" and should be ambitious enough to feel slightly uncomfortable.
2. **Key Results (2 to 4):** specific, measurable outcomes that *prove* the Objective was achieved. They answer "How will I know I got there?"

The critical distinction: a **Key Result (KR)** is **not an activity**. "Attend networking events" is an activity (wrong). "Secure 3 mentors by end of quarter" is a Key Result (right). Activities describe what you *do*; Key Results describe what *changes*.

● MUST MEMORISE**L1 S9**

A **Key Result is not an activity**. Activities describe what you do ("attend events"); Key Results describe what changes ("secure 3 mentors"). This single distinction is tested again and again.

◆ **MEMORY HOOK: A KR IS A RESULT YOU CAN COUNT, NOT A TASK YOU CAN TICK.**

PICK ALL THAT APPLY

L1 S9

Which of these are proper Key Results (not activities)?

- ☐ a Secure 3 mentors by end of quarter
- ☐ b Attend networking events
- ☐ c Grow to 500 connections at 3% engagement by May 31
- ☐ d Read about digital media

ANSWER **a and c.** Both name a measurable change. b and d are activities: things you do, with no measured result.

⚠ TRAP

L1 S9

"Attend networking events" sounds like solid progress, so it is the classic trap answer. It is an **activity**, not a Key Result: it describes what you do, not what changes. The Key Result is "Secure 3 mentors".

TEACH: ADAEZE'S OKR, SCORED

L1 S10

Adaeze, a 300-Level Mass Communication student, set this OKR. Objective: establish herself as a credible emerging voice in digital media before the end of the academic year.

KEY RESULT	RESULT	SCORE
Publish 12 posts (min. 200 views each) by Apr 30	published 9	0.75
Complete one freelance project / internship with published output by June 30	done	1.0
Secure 2 active industry mentors (1 conversation/month) by March 31	found 1	0.5
Grow to 500 connections at 3% engagement by May 31	reached 412	0.8

Her end-of-quarter score was **0.76 (Strong)**. Scoring replaces vague guilt with a structured conversation about what changes next quarter.

FILL IN THE GAP

L1 S10

Adaeze published 9 of her 12 planned posts, scoring _____ on that Key Result, and her overall end-of-quarter score was _____, rated Strong.

ANSWER 0.75; 0.76.

What does OKR scoring achieve, according to the lecture?

- ☐ a It proves whether you passed or failed, all-or-nothing
- ☐ b It replaces vague guilt with a structured conversation about what changes next quarter
- ☐ c It should only be done once a year
- ☐ d It is subjective and best kept private

ANSWER **b.** A 0.76 shows substantial progress even where full achievement was not reached; the point is the next-quarter conversation, not shame.

Framework 3: the 12-Week Year

Brian Moran's solution to lost urgency: treat every 12 weeks as a full year. When you have 12 months, your brain behaves as though there is always more time. Urgency is low in January, relevance fades by June, and panic arrives in October, too late for a full recovery. A 12-week cycle has five elements.

ELEMENT	WHAT IT IS
1. Vision	Your long-term "why" that does not change weekly
2. 12-Week Goal	One to three specific goals for this cycle only
3. Weekly Plan	Specific scheduled actions per week, written not mental
4. Weekly Scorecard	Percent of planned actions completed. Target: 85% or more
5. Weekly Review	What worked? What changes next week?

In the 12-Week Year, the Weekly Scorecard tracks the percent of planned actions completed, with a target of _____ or more.

ANSWER 85%.

Why does the lecture compress goals into 12-week cycles rather than annual ones?

- a** Short cycles force lower-quality decisions because there is too little planning time
- b** 12 weeks is the scientifically optimal duration for all human goal-setting
- c** When timelines are short and repeated, urgency stays psychologically active; annual timelines let the brain perceive abundance of time and procrastinate
- d** Annual goals are outdated and should never be used

ANSWER **c**. This is a real test question. The point is urgency and time perception, not that 12 weeks is magic or that annual plans are banned.

A manager runs quarterly 12-Week Year cycles instead of one annual plan. By the lecture's teaching on urgency and time perception, this is likely to increase follow-through and reduce procrastination.

ANSWER **True**. Four fresh starts keep urgency active all year, which is exactly the framework's purpose.

Framework 4: Implementation Intentions

An **Implementation Intention** pre-decides behaviour so your future self does not get to negotiate in the moment. The psychologist Peter Gollwitzer found that people who specified *when* and *where* they would act followed through two to three times more often than those who only stated strong intentions. The formula is: "**When [specific cue] occurs, I will [specific behaviour].**" The cue must be **concrete**, a time, a place, or a completed action, never "when I feel motivated". In the research, specifying exactly when and where gave a **71%** completion rate, against **32%** for intention only.

The Implementation Intention formula: "**When [cue], I will [behaviour].**" The cue must be **concrete** (time, place, or completed action), never emotional. Gollwitzer's numbers: **71%** follow-through with a specified when-and-where, versus **32%** with intention only.

◆ **MEMORY HOOK: WHEN-THEN BEATS WANT-TO. 71 OVER 32. CONCRETE CUE, NO NEGOTIATION.**

FILL IN THE GAP

L1 S12

People who specified exactly when and where they would act followed through _____ of the time, versus _____ with intention only.

ANSWER 71%; 32%.

TRUE OR FALSE

TEST Q14

L1 S12

"When I feel stressed about my assignment, then I will take a 5-minute break" is a correctly structured Implementation Intention because the cue is concrete and the behaviour is specified.

ANSWER **False**. "When I feel stressed" is an **emotional** cue, not a concrete one. A valid cue is a time, place, or completed action. This is a real test question, and the trap is that it looks correctly structured.

CLOZE SCENARIO

TEST Q7

L1 S12

A student who consistently misses self-imposed deadlines learns that **{Implementation Intentions use a specific formula to pre-decide behaviour so the future self does not negotiate in the moment}**. Her Implementation Intention is structured as **{"When [I sit down at my desk on Monday at 6 PM], I will [complete my weekly planning worksheet]"}**. The **{cue must be concrete (a time, place, or completed action), not vague or emotional}**. Research shows that **{people who specified when and where they would act followed through 71% of the time, versus 32% with intention only}**.

HOW IT IS MARKED Four blanks, one mark each. Every bold span is the correct dropdown choice. This is exactly Test Question 7.

TEACH: THE SIX STEPS TO BUILD ONE

L1 S13

To build an Implementation Intention:

1. Name the goal behaviour: one specific action.
2. Identify your failure mode: when and why it typically does not happen.
3. Find a reliable daily cue: a time, a place, or an existing routine.
4. Write the if-then plan: "When [cue], I will [action]."
5. Pre-empt the obstacle: "If [temptation], then I will [counter-action]."
6. Chain it to an existing habit for automatic triggering.

The obstacle plan is written in the form: "If _____ happens, then I will _____," and the whole intention is then chained to an existing _____ for automatic triggering.

ANSWER [temptation]; [counter-action]; habit.

RECALL AND CHECK

Name the four frameworks and, for each, the one problem it solves.

ANSWER SMART+ER (no structure/emotion), OKRs (no measurable evidence), 12-Week Year (annual planning kills urgency), Implementation Intentions (no trigger to act).

MODULE ONE · UNIT 3

The Psychology of Achievement

Goals rarely fail from laziness. They fail from three predictable psychological forces, and they are sustained not by willpower and inspiration but by environment and systems.

TEACH: THREE REASONS GOALS FAIL

L1 S15

None of the three is laziness.

REASON	WHAT IT IS	THE FIX
Planning Fallacy	We overestimate short-term capacity and underestimate long-term. Add a 40% time buffer.	Work backwards from the deadline; build in the buffer.
Motivation Decay	Motivation peaks at the start and end. Weeks 3 to 8 , the dangerous middle, is when most quit.	Design your system for the middle, not the launch.
Willpower Depletion	Self-control tires with use; relying on it alone is a losing strategy.	Design your environment so the right behaviour needs least resistance.

FILL IN THE GAP

L1 S15

The Planning Fallacy is fixed by adding a _____ time buffer, and Motivation Decay hits hardest in weeks _____, the dangerous middle.

ANSWER 40%; 3 to 8.

MATCH-UP

L1 S15

FAILURE FORCE

ITS FIX

Planning Fallacy

Add a 40% buffer; work backwards from the deadline

Motivation Decay

Design the system for the middle (weeks 3 to 8), not the launch

Willpower Depletion

Design the environment so the right behaviour needs least resistance

⚠ TRAP

L1 S15

When a goal stalls in the middle, the instinct is to blame laziness or lost willpower. The lecture is explicit: none of the three failure forces is laziness, and willpower is a losing strategy to rely on. The answer the exam wants is a **system** and an **environment**, not more effort.

TEACH: SIX ACHIEVEMENT STRATEGIES

L1 S16

Sustain goals when motivation fades using environment and systems, not willpower and inspiration.

STRATEGY

WHAT IT IS

1. Habit Stacking

Attach a new goal behaviour to an existing daily habit

2. Temptation Bundling

Pair a hard task with something you enjoy. Research: **+51%** exercise when bundled with audiobooks

3. The 2-Minute Rule

Commit to just 2 minutes of a hard task. The goal is to start, not to finish

4. Progress Principle

Small wins are the biggest driver of motivation (Amabile, Harvard). Keep a daily progress journal

5. Accountability

A structured accountability partner raises completion to **95%**

6. WOOP

Wish, Outcome, Obstacle, Plan. Mental contrasting outperforms positive visualisation

FILL IN THE GAP

L1 S16

Temptation bundling raised exercise by _____ when paired with audiobooks, and a structured accountability partner raises goal completion to _____.

ANSWER 51% (+51%); 95%.

PICK ONE

L1 S16

The 2-Minute Rule works because:

- ☐ a Two minutes is all any task really needs
- ☐ b The goal is simply to start; starting is the hard part, not finishing
- ☐ c It replaces the need for accountability
- ☐ d It measures your progress precisely

ANSWER **b.** You commit to just 2 minutes of a hard task; the aim is to start.

TEACH: WOOP IN PRACTICE

L1 S17

WOOP stands for **Wish, Outcome, Obstacle, and Plan (WOOP)**. Its power is *mental contrasting*: you visualise the win, then deliberately confront the obstacle, which outperforms positive visualisation alone.

1. **Wish**: state your most important goal clearly and specifically.
2. **Outcome**: visualise the best result vividly. How does it feel to get there?
3. **Obstacle**: name the biggest *internal* obstacle honestly. What has stopped you before?
4. **Plan**: write the if-then response, "If [obstacle], then I will [action]."

Example. Wish: finish my research proposal this month. Outcome: my supervisor approves it; I feel proud and ahead. Obstacle: I get distracted by social media when working alone. Plan: when I sit to write, I switch my phone to airplane mode first.

FILL IN THE GAP

L1 S17

WOOP stands for Wish, _____, _____, and Plan; in the Obstacle step you name the biggest _____ obstacle honestly.

ANSWER Outcome; Obstacle; internal.

PICK ONE

L1 S16, S17

What makes WOOP more effective than plain positive visualisation?

- ☐ a It skips the wish and goes straight to action
- ☐ b Mental contrasting: it visualises the win, then honestly confronts the internal obstacle and plans for it
- ☐ c It relies purely on imagining success
- ☐ d It removes the need for a plan

ANSWER **b.** Mental contrasting outperforms positive visualisation because it pairs the vivid outcome with a concrete obstacle plan.

RECALL AND CHECK

List the six achievement strategies, and the three reasons goals fail.

ANSWER Strategies: habit stacking, temptation bundling, 2-minute rule, progress principle, accountability, WOOP. Failures: planning fallacy, motivation decay, willpower depletion.

MODULE ONE · UNIT 4

Total Man and Goal Architecture

Winning in one area while losing in another is not success. This unit sets goals across every dimension of life, then stacks them from a 10-to-20-year vision down to this week's actions.

TEACH: THE TOTAL MAN DIMENSIONS

L1 S18

The **Total Man** framework covers whole-life excellence across five domains.

DIMENSION	WHAT IT COVERS
Spiritual	Formation, calling, and purpose
Mental	Academic excellence and intellectual growth
Physical	Health, discipline, and bodily stewardship
Social	Relationships, community, and service
Financial	Stewardship and wealth-building discipline

Three questions for aligned goal setting: does this goal serve my **purpose**, not just my preference? Am I building in **every dimension**, or winning in one while crumbling in others? Is this goal aligned with **who I am called to be**?

PICK ALL THAT APPLY

L1 S18

Which are dimensions of the Total Man framework?

- ☐ a Spiritual
- ☐ b Financial
- ☐ c Political
- ☐ d Physical

ANSWER **a, b and d.** The five are Spiritual, Mental, Physical, Social, Financial. "Political" is not one of them.

FILL IN THE GAP

L1 S18

The five Total Man dimensions are Spiritual, Mental, Physical, _____, and _____.

ANSWER Social; Financial.

TEACH: THE 4-LAYER GOAL STACK

L1 S19

Goals nest from vision down to this week. Each layer feeds the one above it.

LAYER	TIMEFRAME	THE QUESTION
Life Vision	10 to 20 years	Who am I called to be?
Strategic Goals	1 to 3 years	What must I build toward that vision?
Quarterly Targets	12 weeks	What do I commit to right now?
Weekly Actions	7 days	What do I actually do this week?

Example (200-Level student). Vision: lead political reform in West Africa. Strategic: a first class plus a scholarship by 2030. Quarterly: raise CGPA 0.2 points this semester. Weekly: notes done Friday, study group Saturday 10am. Weekly actions are not random; they are the bricks that build the vision.

MATCH-UP

L1 S19

LAYER	TIMEFRAME
Life Vision	10 to 20 years
Strategic Goals	1 to 3 years
Quarterly Targets	12 weeks
Weekly Actions	7 days

FILL IN THE GAP

L1 S19, S20

In the 4-Layer Goal Stack, the top layer is the _____ (10 to 20 years), which asks "Who am I called to be?", and the bottom layer is the _____ (7 days).

ANSWER Life Vision; Weekly Actions.

TRUE OR FALSE

L1 S19

In the Goal Stack, weekly actions are chosen freely and independently of the higher layers.

ANSWER **False.** Each layer feeds the one above it; weekly actions are the bricks that build the vision, not random tasks.

RECALL AND CHECK

Name the four layers of the Goal Stack top to bottom, with their timeframes.

ANSWER Life Vision (10 to 20 yrs), Strategic Goals (1 to 3 yrs), Quarterly Targets (12 weeks), Weekly Actions (7 days).

MODULE TWO

Positive Thinking and Creative Problem-Solving

One framework, the W.I.S.E. Model, built from five transformative works across five decades. Wisdom, Inner architecture, Spirit of possibility, and Execution.

Wisdom and Inner Architecture

The whole of this lecture is one framework, drawn from five authors. This unit covers the first two stages: where true insight begins (W), and how to build a mind that can receive it (I).

TEACH: FIVE VOICES, ONE FRAMEWORK

L2 S2

The lecture draws from five works across five decades. Know each author with their book.

AUTHOR	BOOK
Dr. David O. Oyedepo	<i>Winning Wisdom</i> (1996)
Dr. Caroline Leaf	<i>Switch On Your Brain</i> (2013)
Norman Vincent Peale	<i>The Power of Positive Thinking</i> (1952)
Edward de Bono	<i>Lateral Thinking</i> (1970)
James Webb Young	<i>A Technique for Producing Ideas</i> (1939)

TEACH: THE W.I.S.E. MODEL

L2 S3

The **W.I.S.E. Model** has four stages, and each depends on the one before it.

STAGE	FOCUS (THE QUESTION)	SOURCE
W , Wisdom	Where does true insight begin?	Dr. David Oyedepo
I , Inner Architecture	How do I build a mind that can receive it?	Dr. Caroline Leaf
S , Spirit of Possibility	What attitude enables me to act on it?	Norman Vincent Peale
E , Execution	How do I channel it into solutions and ideas?	de Bono and Young

● MUST MEMORISE

L2 S3

W.I.S.E. = Wisdom, Inner architecture, Spirit of possibility, Execution. Oyedepo supplies the source, Leaf prepares the receiver, Peale fuels the engine, de Bono and Young do the execution.

◆ **MEMORY HOOK: W-I-S-E: SEEK IT, BUILD FOR IT, BELIEVE IT, DO IT.**

Match each teaching source to its core contribution (this is Test Question 23).

CONTRIBUTION	SOURCE
The unified approach combining wisdom, instruction, spirit, and execution	W.I.S.E. Model
Belief and experience are causally linked; fear and faith cannot coexist	Norman Vincent Peale
Teaches the 21-day protocol for rewiring toxic thoughts into productive beliefs	SWITCH Protocol
Identifies that fear neurologically suppresses the prefrontal cortex (creative centre)	Dr. Caroline Leaf

Stage W: Winning Wisdom (Oyedepo)

TEACH: WISDOM IS THE FOUNDATION

L2 S4

The central claim: "Winning wisdom is the **supernatural ability to bring solutions to matters too difficult for the ordinary human mind**." (Dr. David Oyedepo, drawing on James 1:5.) The greatest answers are **received** by the prepared thinker, not manufactured; wisdom is not the reward of more effort but the fruit of divine connection. Before you develop your strategy, go to your source.

TEACH: WHAT WISDOM IS AND IS NOT

L2 S5

Wisdom is **not** thinking harder, researching more, or being more disciplined. Wisdom **is** uncovering God's approach to every issue of life, knowing which way to go before the path is fully visible, and above all the **application** of knowledge, not its mere accumulation.

"The application of knowledge is what is called wisdom. Until a man amasses adequate knowledge, there will be nothing for him to use." **Dr. Oyedepo**

TEACH: THE KNOWLEDGE-WISDOM LADDER

L2 S6

Three rungs, and most people never reach the top.

RUNG	WHAT IT IS	WHERE PEOPLE STOP
1. Information	Gathering facts, data, experience	Where most begin
2. Knowledge	Organising and understanding information	Many stop here
3. Wisdom	Applying knowledge to produce results	Most never reach this

Key insight: knowledge gives you **power**; wisdom gives you **strength**. The leap from knowledge to wisdom needs more than study, it requires seeking.

FILL IN THE GAP

L2 S5, S6

Wisdom is the _____ of knowledge, not its accumulation. On the ladder, knowledge gives you _____ but wisdom gives you _____.

ANSWER application; power; strength.

MATCH-UP

L2 S6

RUNG	DEFINITION
Information	Gathering facts, data and experience
Knowledge	Organising and understanding information
Wisdom	Applying knowledge to produce results

Stage I: Inner Architecture (Leaf)

TEACH: YOU ARE THE ARCHITECT

L2 S7

The core discovery: every thought you think **physically changes the structure of your brain** (Romans 12:2). The brain is not fixed; it is a living, dynamic architecture you are constantly building or dismantling. You are not a product of your neurology, you are its **architect**. The critical link: Oyedepo says wisdom must be received; Leaf shows the **mechanism**, a mind prepared to think well is a mind positioned to receive wisdom.

TEACH: THE 21-DAY SWITCH PROTOCOL

L2 S8

The **SWITCH Protocol** is Dr. Leaf's scientifically grounded 21-day brain detox: not motivational self-talk, but a rewiring protocol that literally builds new neural structures. Its six steps:

STEP	ACTION
Gather	Become aware of the toxic thought
Focused Reflection	Examine its root and emotional charge
Write	Externalise it in a journal
Revisit	Review patterns and connections, understand context
Active Reach	Choose and rehearse the replacement thought
Celebrate	Acknowledge growth, reinforce the new pathway

● MUST MEMORISE

L2 S8

SWITCH is a **21-day** protocol that **builds new neural structures through deliberate practice and repetition**. Its six steps in order: **Gather, Focused Reflection, Write, Revisit, Active Reach, Celebrate**. It is not positive self-talk.

◆ **MEMORY HOOK: GATHER, REFLECT, WRITE, REVISIT, REACH, CELEBRATE. REWIRE, DO NOT JUST CHEER.**

CLOZE SCENARIO

TEST Q29

L2 S8

When someone applies the SWITCH protocol to a fear-based thought, they move through six steps. After **{Gathering awareness and conducting Focused Reflection on the root cause, they Write the thought to externalise it}**. Next, they **{Revisit the pattern to see connections and understand context, then engage in Active Reach to deliberately choose and rehearse the replacement thought}**. Finally, they **{Celebrate their growth and reinforce the new pathway through acknowledgment}**. The **{entire protocol is designed to build new neural structures through deliberate practice and repetition}**.

MARKED Four blanks, one mark each. This is Test Question 29.

TRUE OR FALSE

TEST Q30

L2 S8

A person is told to "think positively" and repeats daily affirmations for motivation. The SWITCH Protocol would say this is sufficient for rewiring the underlying fear-based thinking pattern that blocks her creativity.

ANSWER **False**. Affirmations alone are not enough. SWITCH is a full six-step rewiring protocol that builds new neural structures, not motivational self-talk. This is Test Question 30.

PICK ALL THAT APPLY

TEST Q4

L2 S7, S8

Which statements reflect the belief-to-creativity connection accurately?

- ☐ a Positive thinking is purely psychological and has no neurological basis
- ☐ b Fear should be "managed" through acceptance rather than actively replaced
- ☐ c The SWITCH protocol works by building new neural structures, not just as a placebo
- ☐ d When fear neurologically suppresses the prefrontal cortex, creative thinking capacity itself is diminished

ANSWER **c and d**. a and b are false: thought physically rewires the brain, and fear is *replaced*, not merely managed. This is Test Q4.

Spirit and Execution

The last two stages of the W.I.S.E. Model: the attitude that fuels action (S, Peale), and the tools that turn insight into solutions and ideas (E, de Bono and Young).

TEACH: SPIRIT OF POSSIBILITY (PEALE)

L2 S9

The central claim: "What you consistently believe about your situation determines what you will experience." (Norman Vincent Peale.) Peale's role in the model: Oyedepo establishes the source, Leaf prepares the receiver, and **Peale fuels the engine**. A mind rebuilt by Leaf but filled with doubt will not generate the confident, exploratory energy creative problem-solving demands.

TEACH: THE FIVE PRINCIPLES OF POSITIVE THINKING

L2 S10

PRINCIPLE	WHAT IT MEANS
Empty the mind of fear	Fear and faith cannot coexist; fear is a cognitive contraction, not just an emotion
Visualise the outcome	Vivid mental rehearsal primes the brain for the result before it arrives
Affirm what you intend to become	The subconscious accepts what is repeatedly impressed upon it
Overcome the inferiority complex	Without inner permission you resist a breakthrough even when it arrives
Practise energised enthusiasm	Sustained creative work demands sustained positive energy

FILL IN THE GAP

L2 S9, S10

In the W.I.S.E. Model, Oyedepo establishes the source, Leaf prepares the receiver, and Peale _____. Peale teaches that the subconscious accepts what is repeatedly _____ upon it.

ANSWER fuels the engine; impressed.

TEACH: FEAR, FAITH AND CREATIVITY

L2 S11

Why attitude is infrastructure, the three authors agree. Peale: fear and faith cannot occupy the mind at once, choose faith. Leaf: fear neurologically **suppresses the pre-frontal cortex**, the very organ of creative thinking. Oyedepo: fear comes to those who do not regard God's Word. The unified message: fear is not a feeling to be managed; it is a **cognitive stance to be dismantled**, by deliberate active replacement, not passive waiting for confidence.

● MUST MEMORISE

L2 S11

Fear is **replaced**, not managed. Fear neurologically **suppresses the prefrontal cortex**, so it directly diminishes creative capacity. Fear and faith cannot coexist.

◆ **MEMORY HOOK: FEAR SHRINKS THE THINKING BRAIN. DO NOT MANAGE IT, DISMANTLE IT.**

MATCH-UP

TEST Q10

L2 S10, S11

Match each concept to the principle it describes (this is Test Question 10).

CONCEPT	PRINCIPLE
Fear suppresses the prefrontal cortex; creative thinking needs an active, exploratory mind	Fear-Creativity Link
The subconscious accepts what is repeatedly impressed; affirmation rewires belief	Subconscious Programming
Fear is not a feeling to be managed; it is a cognitive stance to be replaced	Active Replacement (not Management)
The state of mind that enables exploration and possibility; incompatible with fear	Spirit of Possibility

PICK ONE

TEST Q13

L2 S9, S11

A manager struggles to delegate because she fears her team "won't do it right." By the W.I.S.E. Model, what must happen first before she can execute effectively?

- ☐ a Her spirit (belief system) must be realigned through deliberate rewiring so that faith in her team's capability can emerge
- ☐ b She must acquire more advanced training in delegation techniques
- ☐ c She should simply push through the fear and delegate anyway to build courage gradually
- ☐ d Her team must be replaced with more competent individuals

ANSWER **a.** Fear is a cognitive stance to be dismantled first (Spirit), not pushed through or out-trained. This is Test Question 13.

Stage E: Lateral Thinking (de Bono)

TEACH: ESCAPE THE PATTERN

L2 S12

De Bono's insight: most problems persist not from lack of intelligence, but from **over-commitment to an existing pattern of thinking**.

VERTICAL THINKING	LATERAL THINKING
Builds on what is known	Challenges what is known
Seeks the one correct answer	Explores many possible answers
Efficient within a pattern	Escapes patterns entirely

The solutions too difficult for the ordinary mind cannot be reached by digging deeper in the same rut.

TEACH: FOUR LATERAL-THINKING TOOLS

L2 S13

1. **Random Entry**: introduce a random word and force a connection to the problem; the arbitrary link opens untravelled pathways.
2. **The Provocative Operation (Po)**: make a deliberate, absurd statement about the problem to disrupt pattern-lock ("Po: our product has no users"), then follow the implications.
3. **Challenge Assumptions**: surface every unexamined assumption and ask, "Why must this be this way?"
4. **The Six Thinking Hats**: White (facts), Red (emotion), Black (caution), Yellow (optimism), Green (creativity), Blue (process).

FILL IN THE GAP

L2 S13

De Bono's deliberate absurd statement to break pattern-lock is called the **Provocative Operation**, abbreviated _____. His six hats are White (facts), Red (emotion), Black (caution), Yellow (optimism), _____ (creativity), and Blue (process).

ANSWER Po; Green.

MATCH-UP

L2 S13

THINKING HAT

ITS FOCUS

White

Facts

Red

Emotion

Black

Caution

Yellow

Optimism

Green

Creativity

Blue

Process

Stage E: A Technique for Producing Ideas (Young)

TEACH: IDEAS ARE NEW COMBINATIONS

L2 S14

Young's central claim: the production of ideas is not a gift, it is a **process**; anyone who follows it faithfully will produce ideas. Two foundational principles: an idea is nothing more than a **new combination** of existing elements; and forming new combinations depends on the capacity to **see relationships** between things that appear unrelated.

TEACH: YOUNG'S FIVE-STEP PROCESS

L2 S15

STEP

ACTION

1. Gather Raw Material

Collect specific and general knowledge voraciously

2. Digest the Material

Turn it over in your mind; let connections form

3. Drop the Problem

Release it entirely; let the subconscious work

4. The Eureka Moment

Capture the idea the instant it arrives

5. Shape and Develop

Refine through critical analysis and collaboration

● MUST MEMORISE

L2 S15

Young's five steps: **Gather, Digest, Drop (incubate), Eureka, Develop**. An idea is a **new combination** of existing elements, found by seeing relationships.

◆ **MEMORY HOOK: GATHER, DIGEST, DROP, EUREKA, DEVELOP. FEED IT, FORGET IT, CATCH IT, FIX IT.**

FILL IN THE GAP

L2 S14, S15

Young says an idea is nothing more than a _____ of existing elements. His third step is to _____ the problem entirely and let the subconscious work.

ANSWER new combination; drop.

TEACH: DE BONO AND YOUNG TOGETHER

L2 S16

The complete creative cycle: Young provides the five-step architecture of idea production; de Bono supplies the tools, especially in steps 1 and 2, to break cognitive locks and broaden thinking; and in step 5 Young relies on de Bono's vertical thinking to refine the raw idea. de Bono teaches you to think **differently**; Young teaches you to produce ideas **systematically**.

TEACH: WHAT ALL FIVE AUTHORS AGREE ON

L2 S17

Across five decades and five disciplines, the same five convictions:

1. **The mind is primary:** inner life matters far more than external circumstances.
2. **Patterns of thought can be changed:** intelligence and potential are developed, not fixed.
3. **Insight is prepared for, not waited for:** breakthroughs reward readiness.
4. **Discomfort is part of the process:** growth passes through resistance the undisciplined mind avoids.
5. **Wisdom, thinking, and creativity are not separate domains:** they are one integrated capacity.

PICK ALL THAT APPLY

TEST Q8

L2 S8, S10, S17

An athlete feels doubt about winning. Which interventions align with the lecture's prescriptions for rewiring doubt?

- ☐ a Avoiding competitive events until confidence naturally builds over time
- ☐ b Deliberately practising visualisation of success to prime the brain for the result before it arrives
- ☐ c Using the SWITCH protocol to externalise doubts and replace them with rehearsed positive self-talk
- ☐ d Assuming the doubt is just an emotion that will fade on its own

ANSWER **b and c.** Insight and confidence are prepared for, not waited for; a and d are passive waiting. This is Test Question 8.

TEACH: THE FULL PICTURE AND THE FIVE TEXTS

L2 S18, S19

The W.I.S.E. Model is **not a sequence to complete once; it is a cycle to inhabit continuously**: W (seek the source), I (prepare the receiver), S (fuel the process), E (channel wisdom into solutions). The five core texts, for reference: Oyedepo, *Winning Wisdom* (1996); Leaf, *Switch On Your Brain* (2013); Peale, *The Power of Positive Thinking* (1952); de Bono, *Lateral Thinking* (1970); Young, *A Technique for Producing Ideas* (1939).

TRUE OR FALSE

L2 S18

The W.I.S.E. Model is a sequence you complete once and then move past.

ANSWER **False.** It is a cycle to inhabit continuously, not a one-time sequence.

RECALL AND CHECK

Name the four W.I.S.E. stages with their author, and Young's five steps.

ANSWER W Wisdom (Oyedepo), I Inner Architecture (Leaf), S Spirit of Possibility (Peale), E Execution (de Bono and Young). Young: Gather, Digest, Drop, Eureka, Develop.

MODULE THREE

Personal Branding and Strategic Positioning

You already have a brand: it is what people say about you when you are not in the room. This module cleans the inside first, then packages and positions it so your name comes to mind when it matters.

The Inner Brand

A brand built on performance without substance collapses under scrutiny. Before you package anything, there must be something worth packaging. This unit cleans the inside of the cup.

TEACH: YOU ALREADY HAVE A BRAND

L3 S2

"Your brand is what people say about you when you are not in the room." (Jeff Bezos.) Every interaction is a data point; every action is a vote for who you are; **silence is not neutrality, it is invisibility**. The question is not whether you have a brand. It is whether you **control** it.

FILL IN THE GAP

L3 S2

Jeff Bezos: "Your brand is what people say about you when you are _____." The question is not whether you have a brand, but whether you _____ it.

ANSWER not in the room; control.

TEACH: THE TUNDE AND EMEKA PROBLEM

L3 S3

Same grade, same university, one job offer. Both graduated with a 2:1 in Engineering. One had spoken at project week, published on LinkedIn, and led his faculty society; the other had the same intelligence and **zero professional visibility**. The hiring manager already knew one name before the interview. Grades were equal; visibility was not. Your undergraduate years are not a waiting room, they are a **brand-building laboratory**.

FILL IN THE GAP

L3 S3

In the Tunde and Emeka problem, grades were equal but _____ was not. Your undergraduate years are not a waiting room; they are a _____.

ANSWER visibility; brand-building laboratory.

TEACH: CLEAN THE INSIDE FIRST

L3 S4

"First clean the inside of the cup and dish, and then the outside also will be clean." (Matthew 23:25-26.) The Pharisees perfected external presentation while masking internal emptiness. The lesson: a brand built on performance without substance collapses under real scrutiny. **Before packaging, there must be something worth packaging.**

TEACH: THE THREE DIMENSIONS OF INNER BRAND

L3 S5

"A good tree cannot bear bad fruit." (Matthew 7:18.) What cleaning the inside actually looks like:

1. **Clarify your Values:** what would you refuse to compromise even if it cost you?
2. **Have Character Consistency:** are you the same person with the professor and with the security guard?
3. **Build Competence Depth:** every skill sharpened is a deposit the brand will one day withdraw.

Brand output is fruit, and fruit does not lie about the tree.

MATCH-UP

L3 S5

DIMENSION OF INNER BRAND	ITS TEST QUESTION
Clarify your Values	What would I refuse to compromise even if it cost me?
Character Consistency	Am I the same person with the professor and the security guard?
Competence Depth	Is every skill a deposit the brand can later withdraw?

FILL IN THE GAP

L3 S4, S5

The Cup analogy teaches that before packaging there must be something worth _____. Brand output is _____, and it does not lie about the tree.

ANSWER packaging; fruit.

TEACH: THE SELF-AUDIT

L3 S6

Know thyself before you brand thyself. Start by asking three trusted people, "What three words describe me professionally?" Their answers are more accurate than your assumptions. Then four questions:

QUESTION	WHAT IT REVEALS
What do I do exceptionally well?	Your zone of strength
What do I care about deeply?	Your brand energy
What do others consistently say about me?	Your external reality
Where do I want to go?	Your strategic direction

MATCH-UP

L3 S6

SELF-AUDIT QUESTION	WHAT IT REVEALS
What do I do exceptionally well?	Zone of strength
What do I care about deeply?	Brand energy
What do others consistently say about me?	External reality
Where do I want to go?	Strategic direction

TEACH: FROM SELF-KNOWLEDGE TO BRAND PILLARS

L3 S7

Adaeze, a 300-Level Computer Science student, is strong in UI/UX, passionate about rural tech access, and known for explaining complexity simply. Her self-audit produced four clear pillars: **Design Thinking, Social Impact, Communication, and Tech for Good**. Now every project, application, and conversation serves one coherent identity. She stopped trying to be everyone's candidate and became **unmistakably herself**.

FILL IN THE GAP

L3 S6, S7

The Self-Audit begins by asking three trusted people what _____ describe you professionally. Adaeze's audit produced four brand _____, so she stopped trying to be everyone's candidate.

ANSWER three words; pillars.

RECALL AND CHECK

Name the three dimensions of inner brand and the four Self-Audit questions.

ANSWER Dimensions: Values, Character Consistency, Competence Depth. Questions: what I do well, what I care about, what others say, where I want to go.

MODULE THREE • UNIT 2

Packaging, Positioning and Presence

Great character poorly communicated is invisible. This unit translates substance into signal, then positions it so, when a specific opening arises, your name comes to mind.

TEACH: PACKAGING, THREE LEVELS

L3 S8

Great character poorly communicated equals **invisible**. Packaging has three levels:

1. **Personal Presentation:** how you dress, carry yourself, and occupy a room. Your presence speaks before your mouth opens.
2. **Professional Documentation:** your CV is not a list, it is a curated narrative. Every line must earn its place.
3. **Digital Presence:** recruiters search you before they meet you; what they find is already forming an impression.

Packaging is **not deception, it is translation**.

● MUST MEMORISE

L3 S8

Packaging is **not deception, it is translation**. Its three levels: Personal Presentation, Professional Documentation, Digital Presence.

◆ **MEMORY HOOK: TRANSLATE, DO NOT FAKE. PRESENT, DOCUMENT, DIGITAL.**

FILL IN THE GAP

L3 S8

Packaging is not deception, it is _____. Its three levels are Personal Presentation, Professional _____, and Digital Presence.

ANSWER translation; Documentation.

TEACH: LINKEDIN, YOUR 24-HOUR REAL ESTATE

L3 S9

LinkedIn is the platform working for you 24 hours a day. Your profile needs at minimum: a professional headshot; a headline that captures your brand, not just your degree; a summary that communicates vision and value; and your projects, leadership roles, and achievements. Beyond LinkedIn: GitHub for tech, a personal site for media, industry engagement everywhere. Old posts are **brand liabilities**: digital hygiene is brand hygiene.

PICK ALL THAT APPLY

L3 S9

Which belong on your LinkedIn profile at minimum, per the lecture?

- ☐ a A professional headshot
- ☐ b A headline that captures your brand, not just your degree
- ☐ c Every opinion you have ever posted, kept forever
- ☐ d A summary communicating vision and value

ANSWER **a, b and d**. Old posts are brand liabilities; digital hygiene is brand hygiene, so c is wrong.

TEACH: POSITIONING IS MINDSHARE

L3 S10

"Companies don't compete in the marketplace; they compete in the minds of consumers." (Al Ries and Jack Trout.) You are not competing for jobs, you are competing for **mindshare**. Being equally known for 5 things means being memorable for none of them. The chain is **Depth of Focus, then Distinction, then Recall, then Opportunity**. When a specific opening arises, does your name come to mind?

● MUST MEMORISE

L3 S10

You compete for **Mindshare**, not jobs. The positioning chain: **Depth of Focus, Distinction, Recall, Opportunity**. Being equally known for five things means being memorable for none.

◆ **MEMORY HOOK: FOCUS, DISTINCT, RECALLED, CHOSEN. KNOWN FOR ONE, NOT FIVE.**

FILL IN THE GAP

L3 S10

You are not competing for jobs, you are competing for _____. The chain runs **Depth of Focus, then _____, then Recall, then _____**.

ANSWER Mindshare; Distinction; Opportunity.

TEACH: FINDING YOUR NICHE

L3 S11

A niche is **not a limitation, it is a launch pad**.

THE GENERALIST	THE SPECIALIST
Competes in a crowded market	Occupies a specific lane
Forgettable across many fields	Memorable in one domain
Available	Sought after

The question to answer before graduation: "Within my field, what is the one area I want to be the go-to person for?"

TRUE OR FALSE

TEST Q24

L3 S11

Specialising too early or focusing on one domain is a limitation that prevents career growth and should be avoided until you gain broad experience across many fields.

ANSWER **False**. A niche is a launch pad, not a limitation. The specialist is sought after; the generalist is merely available. This is Test Q24.

MATCH-UP

L3 S11

TRAIT

WHO

Occupies a specific lane, memorable in one domain, sought after

The Specialist

Competes in a crowded market, forgettable across fields, available

The Generalist

TEACH: NETWORKING IS A MULTIPLIER

L3 S12

Networking is **not collecting contacts or attending events for free food**. It is the cultivation of genuine, mutually beneficial relationships with people doing work that matters. On mentors: they compress timelines and shortcut costly mistakes; to attract one, demonstrate you are already in motion; do not wait to be assigned one, pursue one; the worst they can say is no.

FILL IN THE GAP

L3 S12

Networking is the cultivation of genuine, _____ relationships with people doing work that matters. To attract a mentor, demonstrate you are already _____.

ANSWER mutually beneficial; in motion.

TEACH: THE BRAND BANK ACCOUNT

L3 S13

Every day is a transaction in your **Brand Bank Account**.

DEPOSITS

WITHDRAWALS

Acts of excellence

Unreliability

Integrity under pressure

Poor-quality output

Fulfilled promises

Public negativity

Showing up consistently

Treating "unimportant" people poorly

Reputations are built in the ordinary moments, not the dramatic ones. The greatest threat to your brand is not failure, it is **invisibility**.

Which activities are effective "deposits" into the Brand Bank Account?

- ☐ a Making frequent grand public announcements about her accomplishments
- ☐ b Only focusing on high-visibility tasks that gain external recognition
- ☐ c Delivering committed work on time and with excellence on every project, not just visible ones
- ☐ d Maintaining integrity when no one is watching and treating "unimportant" people with respect

ANSWER **c and d.** Reputations are built in ordinary moments, not dramatic gestures. This is Test Question 28.

A freelancer delivers excellent work and treats everyone professionally, yet two years in she is never referred and must chase every client. Using the Brand Bank Account model, what is most likely happening?

- ☐ a She should lower her prices to become more attractive
- ☐ b She is not actually delivering quality work despite her perception
- ☐ c The market simply does not value her services
- ☐ d Her deposits are strong but invisible; she has built a reputation only with those she directly works with, not the broader market that could refer her

ANSWER **d.** The greatest threat is invisibility, not failure. Strong deposits, no visibility. This is Test Question 25.

One person, every room. The student who is respectful to professors but dismissive to staff, ambitious in interviews but passive in class, values-driven online but compromising in private, is not building a brand, they are **performing one**. Authenticity is **integration**: when private and public align, and words, actions, and values are the same person, you produce what no strategy can manufacture, **trustworthiness**. "Whatever you do, whether in word or deed, do it all in the name of the Lord Jesus." (Colossians 3:17.)

PICK ONE**L3 S14**

According to the lecture, authenticity is best defined as:

- ☐ a Being impressive in interviews and online
- ☐ b Integration: private and public align, and words, actions and values are the same person, producing trustworthiness
- ☐ c Adapting your character to each room you enter
- ☐ d Keeping your private life hidden from your public brand

ANSWER **b**. Authenticity is integration, and its fruit is trustworthiness, which no strategy can manufacture.

PICK ALL THAT APPLY**TEST Q2, Q22****L3 S10, S12, S13**

Which advice reflects the lecture's framework for sustainable career development and positioning?

- ☐ a Build your reputation in ordinary moments through reliability and integrity, not just visible wins
- ☐ b Do not wait to be assigned a mentor; pursue one actively and demonstrate you are already moving forward
- ☐ c Promote your full range of capabilities equally to show versatility
- ☐ d Cultivate relationships with people doing work that matters, and choose one domain for depth rather than spreading thin

ANSWER **a, b and d**. c is the trap: being equally known for many things makes you memorable for none. This combines Test Questions 2 and 22.

TEACH: YOUR NEXT SEVEN DAYS**L3 S15**

The brand starts today. The conclusion's action list: complete your self-audit (four questions, two honest pages); write your brand statement (100 words, true enough to say out loud); optimise your LinkedIn profile (headline, headshot, summary); ask 3 people the "three words" question; and identify one mentor to pursue this semester. The cup is yours to clean; the brand is yours to build.

FILL IN THE GAP**L3 S15**

The seven-day action list includes writing a brand statement of _____ words, true enough to say out loud, and identifying _____ mentor to pursue this semester.

ANSWER 100; one.

RECALL AND CHECK

State the positioning chain, the niche principle, and the definition of authenticity.

ANSWER Chain: Depth of Focus, Distinction, Recall, Opportunity. Niche: a launch pad, not a limitation. Authenticity: integration of private and public, producing trustworthiness.

MODULE FOUR

Systems for Sustainable Success

Success is not accidental; it runs on a system. Here that system is seven interlocking Kits, and every one of them begins with the letter T. Remove one and the engine sputters; install all seven and success becomes inevitable.

The System and Kits 1 to 4

Hard work without a system is an engine with no transmission. This unit installs the first four Kits: Task, Training, Target, and Tools.

TEACH: WHY SUCCESS NEEDS A SYSTEM

L4 S2

"Shallow men think of luck, but wise and strong men believe in cause and effect." (Ralph Waldo Emerson.) Success is not accidental, it runs on a system. A system is **parts working together to deliver a guaranteed result**; hard work without a system is an **engine with no transmission**. When the seven Kits are assembled, success becomes a harvest.

TEACH: THE 7 KITS AT A GLANCE

L4 S3

The Task System is made up of **seven interlocking Kits**, and all seven begin with T.

KIT	THE QUESTION IT ASKS
1. Task	Am I bound to this?
2. Training	Am I equipped?
3. Target	Where exactly am I going?
4. Tools	What do I need in my hand?
5. Timing	When do I step out?
6. Tillage	Am I working?
7. Tarrying	Will I wait for it?

Remove one Kit and the engine sputters; install all seven and success becomes inevitable.

● MUST MEMORISE

L4 S3

The seven Kits, all starting with T, in order: **Task, Training, Target, Tools, Timing, Tillage, Tarrying**.

◆ **MEMORY HOOK: SEVEN T'S, ONE SENTENCE: "TWO TRAINED TARGETS TAKE TIMING, TILLAGE, TARRYING." BOUND, EQUIPPED, AIMED, ARMED, TIMED, WORKING, WAITING.**

MATCH-UP

L4 S3

KIT	ITS QUESTION
Task	Am I bound to this?
Training	Am I equipped?
Target	Where exactly am I going?
Tools	What do I need in my hand?
Timing	When do I step out?
Tillage	Am I working?
Tarrying	Will I wait for it?

FILL IN THE GAP

L4 S2, S3

A system is parts working together to deliver a _____. Hard work without a system is an engine with no _____.

ANSWER guaranteed result; transmission.

Kit 1: Task, necessity is laid upon me

TEACH: SEE THE ASSIGNMENT AS NECESSITY

L4 S4

"Woe is unto me, if I preach not the gospel!" (1 Corinthians 9:16.) Until you see your assignment as a **necessity**, it will never enjoy your best, you will never get the best out of it, and you function as one merely **attempting, not accomplishing**. Necessity is the mother of **Invention**, and Invention is the mother of **Distinction**.

TEACH: ATTEMPT VERSUS TASK

L4 S5

Two mindsets, two outcomes.

ATTEMPT	TASK
"Let me try this"	"This must work"
Retreat is an option	No retreat available
Dies at first resistance	Outlasts opposition
Ends in retirement	Ends in triumph

If you go out to try, you may die in trials. Rather, make your quest a necessity.

MATCH-UP

L4 S5

STATEMENT

MINDSET

"This must work"; no retreat; outlasts opposition; ends in triumph

Task

"Let me try this"; retreat is an option; dies at first resistance; ends in retirement

Attempt

FILL IN THE GAP

L4 S4

Necessity is the mother of _____, and Invention is the mother of _____.

ANSWER Invention; Distinction.

TEACH: THE BOND OF NECESSITY

L4 S6

Lessons from history and scripture. Nigeria Civil War: "To keep Nigeria one is a task that must be done," so every resource was channeled to the task. Apostle Paul: "For to me to live is Christ, and to die is gain." (Philippians 1:21.) Dr. Oyedepo's own covenant: "Lord, should I pretend not to have heard You, see to it that I don't succeed in any other thing I do." **Bind yourself by necessity, or die in bondage.**

TRUE OR FALSE

L4 S5, S6

In the Task mindset, retreat remains available as a sensible backup if resistance proves too strong.

ANSWER **False.** In the Task mindset there is **no retreat available**; that is the Attempt mindset, which dies at first resistance.

Kit 2: Training, quality of training equals degree of triumph

TEACH: TWO FORMS OF TRAINING

L4 S7

"Abram armed his trained servants... and pursued them unto Dan." (Genesis 14:14.) Two forms of training: **Formal**, received from educational institutions, which sets the pace; and **Informal (Personal Development)**, which delivers the goods. Many are schooled, few are trained. Training is proof of **personal commitment**.

TEACH: GIANTS BUILT BY PERSONAL DEVELOPMENT

L4 S8

Qualification is no substitute, nor disqualifier. God requires that one first be trained before he is placed: your **Training determines your Placement**.

FIGURE	FORMAL SCHOOLING	WHAT THEY BUILT
Benjamin Franklin	stopped school at age 10	inventor, diplomat, framer of the U.S. Constitution, founder of the University of Pennsylvania
Richard Branson	school drop-out	the Virgin empire (not a "brain drop-out")
Anthony Robbins	high school only	now teaches professors
Oral Roberts	high school only	founded a leading Christian University

FILL IN THE GAP

L4 S7, S8

The two forms of training are Formal, which sets the _____, and Informal or personal development, which _____. Your training determines your _____.

ANSWER pace; delivers the goods; placement.

MATCH-UP

L4 S8

FIGURE	ACHIEVEMENT
Benjamin Franklin (left school at 10)	Framer of the U.S. Constitution, founded the University of Pennsylvania
Richard Branson (school drop-out)	Founded the Virgin empire
Anthony Robbins (high school only)	Now teaches professors
Oral Roberts (high school only)	Founded a leading Christian University

Kit 3: Target, certainty of goal

TEACH: A TARGET MUST BE FOUR THINGS

L4 S9

"If you don't have a goal, you will live like a goat, looking for the path of least resistance." (Dr. David Oyedepo.) A target must be: **Specific** (not vague), **Defined** (clearly described), **Quantifiable** (measurable progress), and **Yours** (born of your own calling). To live without a target is to end up in tears.

TEACH: NO GOALPOST, NO GAME**L4 S10**

However anointed or talented you are, without a goal you cannot score one. A football match without **goalposts** never ends. Without a target, you copy what is popular: your friend starts a crusade and you join, another opens a shop and you follow, a third returns to school and you enrol, and you end up **disjointed**. Always ask: "What am I actually after?" Stop fighting as one beating the air; run with the tape as your target.

● MUST MEMORISE**L4 S9, S10**

A target must be **Specific, Defined, Quantifiable, and Yours**. Without a goal you cannot score one, like a football match without goalposts; without a target you copy what is popular and end up disjointed. Run with the **tape** as your target.

◆ **MEMORY HOOK: NO GOALPOST, NO GAME. SPECIFIC, DEFINED, QUANTIFIABLE, YOURS.**

PICK ONE**TEST Q16****L4 S10**

An ambitious student has a compelling vision and strong work ethic but keeps shifting priorities based on what is trending. His mentor says, "You're fighting the air instead of running at the tape." What is this pointing to?

- a** He is not reading enough industry publications
- b** His work ethic is insufficient compared to more successful peers
- c** He lacks the networking connections to succeed
- d** The absence of a clear, written goal that targets a specific outcome, so his actions lack aim and dissipate effort

ANSWER **d**. Without a target you copy what is popular and fight the air. This is Test Question 16.

CLOZE SCENARIO**TEST Q21****L4 S9, S10**

An ambitious entrepreneur has studied his field, invested in tools, and prepared extensively, yet has not launched because he is waiting for "the perfect time." The lecture addresses this delay with a direct principle: **{without a clear goal or target, you have nothing to aim at; you fight the air instead of running at the tape}**. The lecture further warns that **{when you lack a written goal, you unconsciously copy what is popular or what others do}**. A football match **{without goalposts never ends, just as success without clear targets is impossible to achieve}**. The **{lecture emphasises running with the tape as your target, with precision and clarity}**.

MARKED Four blanks, one mark each. This is Test Question 21.

Kit 4: Tools, the right instrument for the job

TEACH: WAR WITHOUT ARMS

L4 S11

Going after a task without tools is like going to **war without arms**. Ask, "What will I need to accomplish my goal?" The Bible for the minister; industry books and mentors for the entrepreneur; specific equipment for the specific craft; the works of proven leaders in your chosen field. **Acquire the tools, no matter the cost.**

TEACH: THE SPANNER AND THE KING

L4 S12

Two pictures. **The Spanner**: try loosening a bolt with your bare hands and you will bleed and sweat, but the bolt will not move, because there is a particular tool for the job. **The King**: "What king, going to make war against another king, sitteth not down first, and consulteth whether he be able?" (Luke 14:31.) Dr. Oyedepo's own example: preparing a motivational drive across Africa, he first gathered the works of Norman Vincent Peale and Robert Schuller. **Equip the hand before you attempt the harvest.**

CLOZE SCENARIO

TEST Q11

L4 S11, S12

When an entrepreneur considers launching a venture without proper preparation, the lecture's teaching suggests **{this approach is like going to war without arms, you will expend effort but achieve nothing}**. The lecture's practical advice is **{acquire the tools (knowledge, mentors, resources, proven frameworks) no matter the cost of obtaining them}**. The Spanner metaphor **{illustrates that trying a task without the right tool causes wasted effort}**. The King metaphor **{teaches that a wise leader consults and prepares before committing to battle}**.

MARKED Four blanks, one mark each. This is Test Question 11.

FILL IN THE GAP

L4 S11, S12

Going after a task without tools is like going to _____. Equip the _____ before you attempt the _____.

ANSWER war without arms; hand; harvest.

RECALL AND CHECK

Name Kits 1 to 4 and, for Kit 3, the four things a target must be.

ANSWER Task, Training, Target, Tools. A target must be Specific, Defined, Quantifiable, Yours.

MODULE FOUR • UNIT 2

Kits 5 to 7 and the Self-Audit

The last three Kits govern when you move, how hard you work, and how long you wait: Timing, Tillage, and Tarrying. Then the seven-point self-audit that closes the course.

Kit 5: Timing, commanders understand the times

TEACH: A TIME FOR EVERY PURPOSE

L4 S13

"To every thing there is a season, and a time to every purpose under the heaven." (Ecclesiastes 3:1.) Jesus at Cana: "Mine hour is not yet come." (John 2:4.) Jesus and Lazarus: he abode two more days, and timing produced **resurrection, not mere healing**. The seasonal business: selling iced water on a cold rainy day is a dead business on arrival. Right timing is a major asset; until the time is ripe, do not step out.

TEACH: HOW TO DISCERN TIMING

L4 S14

Timing has two edges: **starting too early** and **waiting too long**, and both are failures of discernment. Four practical disciplines for reading your season:

1. **Ask God sincerely**: approach Him with a clear heart.
2. **Remove distractions**: stand before Him expecting to hear.
3. **Be sensitive to your environment**: resources are often right in your room.
4. **Once green-lit, refuse contrary thoughts**: God provides when He commands.

FILL IN THE GAP

L4 S13, S14

Timing has two edges: starting too _____ and waiting too _____. With Lazarus, Jesus waited so the outcome would be _____, not mere healing.

ANSWER early; long; resurrection.

CLOZE SCENARIO

TEST Q15

L4 S13

Kit 5 in the systems framework addresses **{Timing, understanding the seasons and readiness for when execution will be most effective}**. The lecture teaches that **{to every thing there is a season, and right timing is a major asset}**. Jesus' own teaching in the New Testament models this: **{he said "Mine hour is not yet come" at Cana, and with Lazarus he waited two days so the outcome would be resurrection, not healing}**. The principle: **{until the time is ripe, do not step out, right timing is a major asset}**.

MARKED Four blanks, one mark each. This is Test Question 15.

Kit 6: Tillage, put your hands to work

TEACH: HARD WORK REFINES

L4 S15

Hard work never kills, it only refines; nothing kills like idleness. The future of any assignment is determined by the **quality of your labour input**. Three pictures: **The Foolish Farmer** throws seed on unploughed ground and harvests nothing; **The Oil Well**, no drill, no oil, everything precious requires pressure; **The Teaching Tent**, start with two people and they will tell two more. "He that tilleth his land shall be satisfied with bread." (Proverbs 12:11.)

TEACH: CREATE WORK, DON'T WAIT FOR IT

L4 S16

Tillage is **not random activity, it is disciplined, planned labour**: do not wait for perfect conditions; break your target into daily, doable actions; **prepare in advance** (a winner prepares a full month's messages before the month begins); and create work for yourself, do not wait for work to find you. "By much slothfulness the building decayeth; and through idleness of the hands the house droppeth through." (Ecclesiastes 10:18.)

FILL IN THE GAP

L4 S15, S16

The future of any assignment is determined by the _____ of your labour input. Tillage is not random activity, it is _____, planned labour.

ANSWER quality; disciplined.

MATCH-UP

L4 S15

PICTURE OF TILLAGE	ITS LESSON
The Foolish Farmer	Seed on unploughed ground harvests nothing
The Oil Well	No drill, no oil; everything precious requires pressure
The Teaching Tent	Start with two people; they will tell two more

Kit 7: Tarrying, success is not a seven-day wonder

TEACH: THE DUE-SEASON CALENDAR

L4 S17

God runs a **Due-season Calendar**: when you are due, He will not deny you. Between planted seed and gathered harvest there is always a waiting period. Rome was not built in a day; a child born at six months is premature; every great manifestation requires a **gestation period**. "Though it tarry, wait for it; because it will surely come, it will not tarry." (Habakkuk 2:3.)

TEACH: THE SLEDGEHAMMER AND JERICO**L4 S18**

Your current blows are weakening the wall, so do not stop. **The Wall:** a man with a sledgehammer cannot quit after one blow; the wall falls at the 50th, but it is the result of all 49 before it. **Jericho:** Israel marched for six days and nothing happened; on the seventh day the walls fell, same process, different timing. When results tarry: do not give up; re-examine the Kits and repair anything out of place; wait for the manifestation.

FILL IN THE GAP**L4 S17, S18**

Every great manifestation requires a _____ period. The wall falls at the _____ blow, but it is the result of all the blows before it.

ANSWER gestation; 50th.

PICK ONE**L4 S18**

According to the Sledgehammer and Jericho lesson, when your results tarry you should:

- ☐ a Give up, because the timing was clearly wrong
- ☐ b Do not give up; re-examine the Kits, repair anything out of place, and wait for the manifestation
- ☐ c Change your target to something easier
- ☐ d Start over from scratch with a new system

ANSWER **b.** The 50th blow depends on the 49 before it; do not stop, re-examine and repair, and wait.

CLOZE SCENARIO**TEST Q9****L4 S3, S9, S11, S13, S15**

A newly hired department head is designing systems for her team's success. She knows they need **{a clear vision with precision (specific targets to run toward, not vague directions)}**. She implements this by **{establishing written quarterly goals where each person knows exactly what they are after}**. She also ensures they have **{the right tools and knowledge (Kit 4) to accomplish their domain-specific work}**. She further addresses **{Kit 5 (timing considerations for when execution will be most effective) and Kit 6 (persistent tillage or cultivation for sustainable results)}**.

MARKED Four blanks, one mark each. This is Test Question 9, and it links four Kits at once.

TEACH: THE 7-POINT SELF-AUDIT**L4 S19**

The course closes with a self-audit. For the assignment most alive in your heart, answer Yes, Partly, or No: **Task**, bound by necessity? **Training**, developing daily? **Target**, stated in one sentence? **Tools**, in your hand? **Timing**, the right season? **Tillage**, hands to the work? **Tarrying**, waiting with endurance?

MATCH-UP**TEST Q12****L4 S19**

Match each element to its description (this is Test Question 12).

DESCRIPTION	ELEMENT
Persistent, humble cultivation and hard work, letting results grow over time	Kit 6: Tillage
The clear, specific target you are running toward (not fighting the air)	Vision with Precision (Kit 3, Target)
Understanding that seasons change and readiness must align with action timing	Kit 5: Timing
Acquiring the specific tools, knowledge, and resources for your chosen domain	Kit 4: Tools

RECALL AND CHECK

Recite all seven Kits in order, each with its one-word job.

ANSWER Task (bound), Training (equipped), Target (aimed), Tools (armed), Timing (season), Tillage (working), Tarrying (waiting).

MODULE FIVE

Overcoming Discouragement and Sustaining Personal Success

Everything so far assumed you keep going. This lecture is about the day you do not want to. It names the enemy, gives you the science that says persistence beats talent, anchors you in vision, builds you on three pillars, and hands you four strategies and a seven-step plan.

Discouragement and the Grit to Outlast It

First, what discouragement actually is, then the finding that the enemy is never the problem but your response to it, then the one trait that predicts achievement, and finally the image the whole lecture turns on: the 50th blow.

TEACH: WHAT DISCOURAGEMENT IS

L5 S2

Discouragement is **the gradual withdrawal of the courage to continue**. Read the definition slowly, because every word is doing work. It is **gradual**, not sudden, which is why the lecture calls it **the slow leak**: nobody quits in one dramatic moment, they leak courage until there is none left. And what leaks out is **courage**, not ability. You do not lose the capacity to continue, you lose the willingness.

TEACH: THE FIVE PLACES IT SHOWS UP

L5 S2

The lecture lists five student-sized sources, and the exam can name any one of them:

SOURCE	HOW IT APPEARS
Academic pressure	poor grades, imposter syndrome
Social comparison	watching peers "have it all together"
Financial constraints	limiting your options
Career uncertainty	"What do I do with this degree?"
Failure	in relationships, goals, or extracurricular pursuits

● MUST MEMORISE

L5 S2

Discouragement is the gradual withdrawal of the courage to continue. It is a slow leak, not a blowout.

◆ **MEMORY HOOK: A SLOW LEAK OF COURAGE. NOBODY QUILTS AT ONCE, THEY LEAK.**

FILL IN THE GAP

L5 S2

Discouragement is the _____ withdrawal of the _____ to continue.
The lecture pictures it as the slow _____ that drains you.

ANSWER gradual; courage; leak.

Which of these does the lecture list as a way discouragement shows up? (Select all that apply.)

- ☐ a Social comparison, watching peers "have it all together"
- ☐ b Career uncertainty, "What do I do with this degree?"
- ☐ c A physical illness that removes your ability to work
- ☐ d Academic pressure, poor grades and imposter syndrome

ANSWER **a, b and d.** The five listed sources are academic pressure, social comparison, financial constraints, career uncertainty, and failure in relationships, goals or extracurricular pursuits. Option c is never mentioned, and it is the wrong shape anyway: discouragement withdraws courage, not capacity.

SOURCE OF DISCOURAGEMENT	HOW THE LECTURE DESCRIBES IT
Academic pressure	Poor grades, imposter syndrome
Social comparison	Watching peers "have it all together"
Financial constraints	Limiting your options
Career uncertainty	"What do I do with this degree?"
Failure	In relationships, goals, or extracurricular pursuits

The real enemy is your response

"For a just man falleth seven times, and riseth up again." (Proverbs 24:16.) Notice what the verse concedes: the just man **does** fall, and he falls **seven** times. Falling is not the disqualifier. The lecture puts it as a banner: **Seven falls is not Disgrace. Staying on the floor is.** So the enemy is never the pressure itself, it is which of two responses you make to it.

THE WRONG RESPONSE	THE RIGHT RESPONSE
Surrender to the pressure	Endure through the pressure
Define yourself by the fall	Rise every time you fall
Stop at the 49th blow	Deliver the 50th blow

MATCH-UP

L5 S3

Sort each into the Wrong Response or the Right Response column.

BEHAVIOUR	COLUMN
Surrender to the pressure	Wrong Response
Endure through the pressure	Right Response
Define yourself by the fall	Wrong Response
Rise every time you fall	Right Response
Stop at the 49th blow	Wrong Response
Deliver the 50th blow	Right Response

TRUE OR FALSE

L5 S3

According to the lecture, falling seven times is itself the disgrace.

ANSWER **False.** "Seven falls is not Disgrace. **Staying on the floor is.**" The verse expects the fall and measures you by the rising.

FILL IN THE GAP

L5 S3

The lecture insists the real enemy is not the problem, it is your _____. The wrong response is to stop at the _____ blow; the right response is to deliver the _____ blow.

ANSWER response; 49th; 50th.

The science of grit

TEACH: WHAT ACTUALLY PREDICTS SUCCESS

L5 S4

Angela Duckworth studied **West Point cadets, spelling bee champions, and top entrepreneurs**, asking what separated those who finished from those who did not. Three obvious candidates failed the test: **IQ, Talent, and Social class**. One survived: **Grit**, described as **the only consistent predictor across all high achievers**. Her definition is a formula worth memorising exactly: **Grit = Passion + Long-term Perseverance**. Passion alone is enthusiasm; perseverance alone is drudgery; grit is the two held together over years. "Our potential is one thing. What we do with it is quite another." (Angela Duckworth, *Grit*.)

● MUST MEMORISE

L5 S4

Grit = Passion + Long-term Perseverance, and grit is **the only consistent predictor** of success across all high achievers. Not IQ, not talent, not social class. Studied in West Point cadets, spelling bee champions, and top entrepreneurs.

◆ **MEMORY HOOK: TWO WORDS MAKE GRIT, PASSION PLUS PERSEVERANCE, AND THE SECOND ONE IS LONG-TERM. THREE RIVALS STRUCK OUT: IQ, TALENT, CLASS.**

PICK ONE

L5 S4

In Duckworth's research, which factor turned out to be the only consistent predictor of success across all high achievers?

- ☐ a A high IQ measured before training began
- ☐ b Natural talent in the chosen domain
- ☐ c Grit, defined as passion plus long-term perseverance
- ☐ d Social class and the resources it provides

ANSWER **c.** IQ, talent and social class were exactly the three she ruled out. Grit was the survivor.

FILL IN THE GAP

L5 S4

Grit = _____ + _____. Duckworth studied West Point _____, spelling bee champions, and top entrepreneurs.

ANSWER Passion; Long-term Perseverance; cadets.

TRUE OR FALSE

L5 S4

Duckworth found that talent still predicts achievement reliably, but only once grit is also present.

ANSWER **False.** Talent is one of the three factors the research struck out, alongside IQ and social class. The slide does not make talent a conditional predictor; it makes grit the **only** consistent one.

The 50th blow

TEACH: THE SLEDGEHAMMER PRINCIPLE

L5 S5

The Sledgehammer Principle (Dr Oyedepo): a man swings at a wall, blow after blow, and nothing happens. **Blow 10 = Nothing. Blow 30 = Nothing. Blow 49 = Nothing. Blow 50 = the wall collapses.** Then comes the point the whole lecture rests on: **it was not the 50th blow that brought it down, it was the cumulative force of ALL the blows before it.** Which means the invisible blows were never wasted: **the results you cannot see today are being built by the work you are doing now.** So do not stop at blow 49. This is the same wall from Lecture 4's Kit 7, Tarrying, and Lecture 5 supplies the numbers.

● MUST MEMORISE

L5 S5

Blow 10, nothing. Blow 30, nothing. Blow 49, nothing. **Blow 50, the wall collapses.** And the collapse belongs to **all** the blows, not to the last one.

◆ **MEMORY HOOK: THE 50TH GETS THE CREDIT, THE 49 DID THE WORK. DON'T STOP AT 49.**

⚠ TRAP

L5 S5

The tempting answer is "the 50th blow was the decisive one, so the earlier blows mattered less." The slide says the exact opposite in bold: it was **not** the 50th blow that brought it down, it was the **cumulative force of ALL the blows before it**. If an option credits the final blow, it is the distractor.

PICK ONE

L5 S5

A student has revised daily for six weeks and still sees no improvement in his practice scores. Applying the Sledgehammer Principle, what is the correct reading of his situation?

- (a) Six weeks with no visible result proves the method is wrong and must be replaced
- (b) The results he cannot see yet are being built by the work he is doing now, so he must not stop at blow 49
- (c) He should wait passively, since the breakthrough arrives on a fixed schedule regardless of effort
- (d) Visible progress is the only evidence that effort counts, so he should switch to an easier target

ANSWER **b**. Option c is the trap of passivity: the wall falls because blows keep landing, not because time passes. Options a and d both measure the work by what is visible, which is precisely what the principle forbids.

A final-year student has failed the same professional exam twice and is deciding whether to sit it again. The lecture would first correct his diagnosis: **{the real enemy is not the problem itself but his response to it, since surrendering to the pressure is the wrong response and enduring through it is the right one}**. It would then reassure him from the research: **{grit, meaning passion plus long-term perseverance, is the only consistent predictor of success across all high achievers, ahead of IQ, talent and social class}**. It would reframe the two failures: **{seven falls is not disgrace, staying on the floor is, for a just man falls seven times and rises up again}**. And it would tell him what his invisible work has already done: **{the wall falls at the 50th blow only because of the cumulative force of all the blows before it, so he must not stop at blow 49}**.

MARKED Four blanks, one mark each.

RECALL AND CHECK

Define discouragement in the lecture's exact words, give Duckworth's formula for grit, and say who gets the credit for the wall falling.

ANSWER Discouragement is the gradual withdrawal of the courage to continue. Grit = Passion + Long-term Perseverance. The wall falls to the cumulative force of all the blows, not to the 50th.

MODULE FIVE · UNIT 2

Vision, the Anchor That Holds

Grit needs something to be gritty about. This unit is the anchor: what vision gives you, how a vision differs from a dream, and the three questions that uncover yours.

TEACH: YOU ARE NOT A BIOLOGICAL ACCIDENT

L5 S6

"Where there is no vision, the people perish." (Proverbs 29:18.) Life without a God-ordained bearing is a burden, and life remains an endless struggle without vision. (Dr. Oyedepo.) The lecture then makes vision practical by naming exactly **three** things it gives you:

WHAT VISION GIVES	BECAUSE
Direction	you know where you are going
Motivation	you know why you are going there
Endurance	you can withstand pain when the destination is worth it

Endurance is the one that ties this unit back to Unit 1: vision is what makes the 49 invisible blows bearable, because it makes the destination worth the pain.

MATCH-UP

L5 S6

GIFT OF VISION

WHAT IT ANSWERS

Direction	You know where you are going
Motivation	You know why you are going there
Endurance	You can withstand pain when the destination is worth it

FILL IN THE GAP

L5 S6

Vision is the _____ that holds you when storms come. It gives Direction, _____, and _____.

ANSWER anchor; Motivation; Endurance.

TRUE OR FALSE

L5 S6

In the lecture, Motivation is the gift of vision that tells you *where* you are going.

ANSWER **False.** **Direction** tells you where. Motivation tells you **why**. The exam swaps these two on purpose.

A dream is not a vision

TEACH: VISION IS A MISSION, NOT JUST A DREAM

L5 S7

"Vision is a discovery of God's plan for one's life, a discovery of one's mission on earth." (Dr. Oyedepo.) The lecture then sets the two words side by side, and every row is a testable contrast:

A DREAM

A VISION

Vague and undefined	Specific and purposeful
About what you want	About what you are called to do
Fades under pressure	Anchors you under pressure
Self-centred	Need-meeting

The last row is the sharpest: a dream serves you, a vision meets a need. That is the whole difference between wanting a career and having a mission.

● MUST MEMORISE

L5 S7

Dream against Vision, in the slide's four pairs: **vague** against **specific and purposeful**; **what you want** against **what you are called to do**; **fades under pressure** against **anchors you under pressure**; **self-centred** against **need-meeting**.

◆ **MEMORY HOOK: A DREAM IS ABOUT YOU AND FOLDS; A VISION IS ABOUT A NEED AND HOLDS.**

MATCH-UP

L5 S7

Label each description as belonging to A Dream or A Vision.

DESCRIPTION	LABEL
Vague and undefined	A Dream
Specific and purposeful	A Vision
About what you want	A Dream
About what you are called to do	A Vision
Fades under pressure	A Dream
Anchors you under pressure	A Vision
Self-centred	A Dream
Need-meeting	A Vision

⚠ TRAP

L5 S7

"A vision is a big dream you are serious about." That is the plausible everyday answer and it is wrong twice over. A vision differs from a dream in **kind**, not in size: it is about what you are **called to do** rather than what you **want**, and it is **need-meeting** rather than **self-centred**. Any option that makes the difference one of degree is the distractor.

PICK ONE

L5 S7

A student says, "My vision is to become wealthy enough to never worry about money." Judged by the lecture's own table, what is wrong with calling this a vision?

- (a) Nothing; it is specific and time-bound, which is all a vision requires
- (b) It is self-centred and about what he wants, so it is a dream; a vision is need-meeting and about what he is called to do
- (c) It is too ambitious, and visions should be modest and achievable
- (d) It names money, and the lecture forbids financial goals

ANSWER **b**. Two rows of the table condemn it at once. Option c invents a modesty rule the lecture never states, and d invents a ban on financial goals that contradicts the Total Man's financial dimension from Lecture 1.

Discovering your own vision

TEACH: THREE QUESTIONS THAT UNLOCK PURPOSE

L5 S8

"If any man has no purpose for living, he is not fit to live." (Martin Luther King Jr.) The lecture gives exactly three questions, to be asked **honestly**:

1. **What problem breaks your heart?** The problem you are called to solve often reveals your purpose.
2. **What could you do for free, for life, and still feel fulfilled?**
3. **At age 70, looking back, what would you regret not having done?**

Note the shape of the three: the first looks outward at a need, the second inward at what sustains you without payment, and the third forward from the end of your life. Together they triangulate a mission rather than a preference.

PICK ALL THAT APPLY

L5 S8

Which of these are among the three vision-discovery questions the lecture gives? (Select all that apply.)

- ☐ a What problem breaks your heart?
- ☐ b What could you do for free, for life, and still feel fulfilled?
- ☐ c Which career pays the most in your field over a lifetime?
- ☐ d At age 70, looking back, what would you regret not having done?

ANSWER **a, b and d.** Option c inverts the second question: the lecture's test is what you would do **for free**, precisely because payment cannot be the thing holding you there.

FILL IN THE GAP

L5 S8

The third discovery question asks you to stand at age _____ and look back at what you would _____ not having done. The first asks what problem _____.

ANSWER 70; regret; breaks your heart.

A second-year student cannot say why she is on her course. The lecture would begin by telling her what she is missing: **{vision, the anchor that holds you when storms come, which gives Direction, Motivation and Endurance}**. It would separate the two things she keeps confusing: **{a dream is vague, about what you want, fades under pressure and is self-centred, while a vision is specific and purposeful, about what you are called to do, anchors you under pressure and is need-meeting}**. It would define the target itself: **{vision is a discovery of God's plan for one's life, a discovery of one's mission on earth}**. And it would hand her the three honest questions: **{what problem breaks your heart, what could you do for free for life and still feel fulfilled, and at age 70 what would you regret not having done}**.

MARKED Four blanks, one mark each.

RECALL AND CHECK

Name the three gifts of vision, the four contrasts between a dream and a vision, and the three discovery questions.

ANSWER Direction, Motivation, Endurance. Vague against specific and purposeful; what you want against what you are called to do; fades against anchors under pressure; self-centred against need-meeting. What problem breaks your heart; what could you do for free for life and still feel fulfilled; at 70 what would you regret not having done.

MODULE FIVE · UNIT 3

The Three Pillars of Success

Vision, Information and Hard Work. The lecture's cleverest teaching is not the three pillars themselves but the three ways success collapses when one of them is missing. Learn the failures and the pillars come free.

TEACH: THREE PILLARS, AND THE THREE COLLAPSES

L5 S9

"Success is a complex, multi-component product made up of several systems." (Dr. Oyedepo.) The three components are **VISION** (know where you are going), **INFORMATION** (feed your mind relentlessly), and **HARD WORK** (perspiration is the price). Now the part the exam loves: each pairing that leaves one pillar out has its own named failure.

WHAT YOU HAVE	WHAT IS MISSING	WHERE IT ENDS
Information, no hard work	Hard Work	Frustration
Hard work, no vision	Vision	Exhaustion
Vision, no information	Information	Stagnation

Each failure is the honest consequence of what is absent. Knowing without doing frustrates; labouring without direction exhausts; aiming without knowledge stalls.

● MUST MEMORISE

L5 S9

Information without hard work ends in **Frustration**. Hard work without vision ends in **Exhaustion**. Vision without information ends in **Stagnation**.

◆ **MEMORY HOOK: KNOW BUT DON'T DO, FRUSTRATION. DO BUT DON'T AIM, EXHAUSTION. AIM BUT DON'T LEARN, STAGNATION. F, E, S.**

MATCH-UP

L5 S9

THE COMBINATION	WHERE IT ENDS
Information without hard work	Frustration
Hard work without vision	Exhaustion
Vision without information	Stagnation

PICK ONE

L5 S9

A graduate works punishing hours at whatever task lands on her desk, has no idea what she is building toward, and ends each year drained with nothing accumulated. Which pillar is missing, and what does the lecture call the outcome?

- ☐ a Information is missing, and the outcome is Stagnation
- ☐ b Vision is missing, and the outcome is Exhaustion
- ☐ c Hard work is missing, and the outcome is Frustration
- ☐ d All three are missing, and the outcome is Discouragement

ANSWER **b**. She has hard work in abundance and no vision, which the slide names exactly: hard work without vision ends in Exhaustion. Option d borrows a word from Slide 2 that is not one of the three failure modes.

FILL IN THE GAP

L5 S9

The three pillars are Vision, _____, and Hard Work. Information without hard work ends in _____; vision without information ends in _____.

ANSWER Information; Frustration; Stagnation.

Pillar 1: vision in practice, the Precision Test

TEACH: RUN WITH PRECISION, NOT JUST PASSION

L5 S10

"If you don't have a target, you'll keep following whatever is popular." (Dr. Oyedepo.) That is the same warning as Lecture 4's Kit 3, and here it gets a four-part test. **The Precision Test**, a goal must be:

1. **Specific**: not "do better," but "achieve 4.90 GPA"
2. **Measurable**: you can track it
3. **Time-bound**: it has a deadline
4. **Written**: if it is not written, it is a wish

The action the slide asks for: **write your top 3 goals for the next 12 months**. That is your target. Now run.

Compare with SMART from Lecture 1. The Precision Test keeps Specific, Measurable and Time-bound, drops Achievable and Relevant, and adds one SMART never had: **Written**. And "if it is not written, it is a wish" lands exactly on Lecture 1's bottom rung, the Wish.

● MUST MEMORISE

L5 S10

The Precision Test: **Specific, Measurable, Time-bound, Written**. If it is not written, it is a **wish**. The slide's own example of specific is "achieve **4.90 GPA**", not "do better".

◆ **MEMORY HOOK: FOUR CHECKS, AND THE FOURTH IS THE PEN. UNWRITTEN EQUALS WISH.**

PICK ALL THAT APPLY

L5 S10

Which are part of the Precision Test as the lecture states it? (Select all that apply.)

- ☐ a Written, because if it is not written it is a wish
- ☐ b Time-bound, because it has a deadline
- ☐ c Achievable, because a goal beyond reach demotivates
- ☐ d Specific, not "do better" but "achieve 4.90 GPA"

ANSWER **a, b and d**. Option c is Achievable, which belongs to SMART in Lecture 1 and is **not** one of the Precision Test's four. This is the exact cross-lecture swap the exam can make.

TRUE OR FALSE

L5 S10

The lecture asks you to write your top three goals for the next twelve months.

ANSWER **True**. "Write your top 3 goals for the next 12 months. That is your target. Now run."

FILL IN THE GAP

L5 S10

The Precision Test says a goal must be Specific, Measurable, Time-bound and _____: if it is not written, it is a _____. The slide's example of a specific goal is to achieve a _____ GPA.

ANSWER Written; wish; 4.90.

Pillar 2: information, and the 1% Rule

TEACH: KNOWLEDGE IS THE NEW CURRENCY

L5 S11

"One is either building a library or building a mortuary without knowing." (Dr. Oyedepo.) The lecture makes the reading habit arithmetical and calls it **The 1% Rule**: a small daily slice, compounded, becomes a library.

ACTION	DAILY TIME	ANNUAL OUTPUT
Read non-academic books	20 to 30 min	12 to 18 books/year
Over 4 years of university	Daily	48 to 72 books

Note the word **non-academic**: the rule is about reading beyond your syllabus, which is what makes it a habit rather than coursework. Two **Biblical Models of Lifelong Learners** close the slide: **Daniel**, who remained relevant under **3 kings for 65 years**, and **Paul the Apostle**, whose request was "Bring the books" (2 Timothy 4:13).

● MUST MEMORISE

L5 S11

The 1% Rule: **20 to 30 minutes daily** of **non-academic** reading gives **12 to 18 books a year**, and **48 to 72 books** across four years of university. Daniel stayed relevant under **3 kings for 65 years**; Paul asked for **the books**.

◆ **MEMORY HOOK: HALF AN HOUR A DAY BUILDS A LIBRARY. 20 TO 30, 12 TO 18, 48 TO 72.**

FILL IN THE GAP

L5 S11

Under the 1% Rule, reading non-academic books for _____ minutes a day yields _____ books a year, and _____ books over four years of university.

ANSWER 20 to 30; 12 to 18; 48 to 72.

MATCH-UP

L5 S11

LIFELONG LEARNER

WHAT THE LECTURE SAYS OF HIM

Daniel

Remained relevant under 3 kings for 65 years

Paul the Apostle

"Bring the books" (2 Timothy 4:13)

PICK ONE

L5 S11

What kind of reading does the 1% Rule prescribe for those 20 to 30 daily minutes?

- ☐ a Non-academic books, read beyond the syllabus
- ☐ b Only the recommended textbooks for the current semester
- ☐ c News and current affairs, to stay informed
- ☐ d Whatever is trending, so that you can hold a conversation

ANSWER **a**. The table says **non-academic** books. Option d also collides with Pillar 1: following whatever is popular is what happens when you have no target.

Pillar 3: hard work, and the Alexander Kroll story

TEACH: PERSPIRATION IS THE PRICE

L5 S12

"Until you're ready for the sweat, you're not set for the sweet." (Dr. Oyedepo.) **The Alexander Kroll Story** in three beats:

1. **Dreamed** of being a footballer, but had the **wrong physical build**.
2. **Solution:** woke at **2:30 a.m. every night** to train.
3. **Result:** built the muscles, and **earned his place on the team**.

The point is not the hour, it is that the obstacle was physical and the answer was still work. He did not find a shortcut around the wrong build, he built a different body.

FILL IN THE GAP

L5 S12

Alexander Kroll dreamed of being a _____ but had the wrong physical _____. He woke at _____ every night to train, and earned his place on the team.

ANSWER footballer; build; 2:30 a.m.

Kroll solved the problem of his wrong physical build by switching to a sport that suited his body.

ANSWER **False.** He kept the goal and paid the price: he woke at 2:30 a.m. every night to train, built the muscles, and earned his place on the team. That is why the story sits under "there is no shortcut".

Fixed mindset against growth mindset

Carol Dweck's contrast, in the slide's three rows:

FIXED MINDSET	GROWTH MINDSET
"I'm just not smart enough"	"I haven't mastered this yet "
Failure = who I am	Failure = feedback
Avoids challenge	Embraces challenge

The whole distinction hangs on one word in row one, **yet**, which turns a verdict on your identity into a report on your progress. Row two is the same move: the fixed mindset reads failure as **identity**, the growth mindset reads it as **information**. The slide closes: every weight of glory is preceded by a season of **perspiration**.

Label each as Fixed Mindset or Growth Mindset.

STATEMENT	MINDSET
"I'm just not smart enough"	Fixed Mindset
"I haven't mastered this yet"	Growth Mindset
Failure = who I am	Fixed Mindset
Failure = feedback	Growth Mindset
Avoids challenge	Fixed Mindset
Embraces challenge	Growth Mindset

PICK ONE

L5 S13

A student fails a test and says, "Good, now I know which topics I have not mastered yet." In Dweck's terms this is:

- ☐ a A fixed mindset, because he is dwelling on the failure
- ☐ b A growth mindset, because failure is treated as feedback rather than as who he is
- ☐ c Neither; Dweck's mindsets describe teachers, not students
- ☐ d A growth mindset only if he also passes the retake

ANSWER **b**. Two markers are present at once: failure as feedback, and the word **yet**. Option d smuggles in a results test the mindset framework does not use.

FILL IN THE GAP

L5 S13

The fixed mindset says "I'm just not smart enough" and treats failure as _____; the growth mindset says "I haven't mastered this _____" and treats failure as _____. Every weight of glory is preceded by a season of _____.

ANSWER who I am; yet; feedback; perspiration.

CLOZE SCENARIO

L5 S9, S10, S11, S12, S13

A student is bright, reads widely, and has still produced nothing in two years. The lecture's diagnosis is precise: **{information without hard work ends in Frustration, which is exactly what he is feeling}**. It would fix his aim first, using the Precision Test: **{a goal must be Specific, Measurable, Time-bound and Written, and if it is not written it is a wish}**. It would keep his reading but discipline it: **{the 1% Rule, 20 to 30 minutes of non-academic reading daily, giving 12 to 18 books a year and 48 to 72 across four years}**. And it would set his expectation about the cost, in the words of the Kroll story and Dweck together: **{there is no shortcut, perspiration is the price, and failure is feedback rather than a verdict on who he is}**.

MARKED Four blanks, one mark each.

RECALL AND CHECK

Name the three pillars, the three failure modes with the pillar each one lacks, the four parts of the Precision Test, and the numbers in the 1% Rule.

ANSWER Vision, Information, Hard Work. Information without hard work = Frustration; hard work without vision = Exhaustion; vision without information = Stagnation. Specific, Measurable, Time-bound, Written. 20 to 30 minutes daily, 12 to 18 books a year, 48 to 72 over four years.

Four Strategies and the 7-Step Plan

Sustaining the fire takes four named strategies, then the course closes with a seven-step plan and one arithmetic fact about compounding that makes the whole thing worth doing.

TEACH: STRATEGY 1, RESIST

L5 S14

RESIST: build endurance like a soldier (2 Timothy 2:3). **Four Truths About Resistance:**

1. Discouragement attacks hardest in the **middle** of the journey.
2. Every champion has **marks of failure** in their past record.
3. **Opposition is not a sign to stop, it is proof you are moving.**
4. The crown is on the other side of the endurance.

"Winners never quit, and quitters never win." (Oral Robert, as the slide prints the name.) The strategy in one line: **rise again, every time. That is the strategy.**

Truth one is the practically useful one: if the attack is heaviest in the **middle**, then feeling worst halfway through is evidence you are halfway through, not evidence you were wrong to start.

● MUST MEMORISE

L5 S14

Four Truths About Resistance: discouragement attacks hardest in the **middle**; every champion carries **marks of failure**; **opposition is proof you are moving**, not a sign to stop; the **crown is on the other side of the endurance**.

◆ **MEMORY HOOK: MIDDLE, MARKS, MOVING, CROWN. THE WORST POINT IS THE MIDPOINT.**

PICK ALL THAT APPLY

L5 S14

Which are among the Four Truths About Resistance? (Select all that apply.)

- ☐ a Discouragement attacks hardest in the middle of the journey
- ☐ b Opposition is not a sign to stop, it is proof you are moving
- ☐ c Champions are distinguished by having no failures on their record
- ☐ d The crown is on the other side of the endurance

ANSWER **a, b and d.** Option c reverses the actual truth: **every** champion has marks of failure in their past record.

FILL IN THE GAP

L5 S14

Strategy 1 is _____: build endurance like a _____. Discouragement attacks hardest in the _____ of the journey.

ANSWER RESIST; soldier; middle.

GUARD YOUR JOY: it is **a weapon, not a luxury**. That framing is the testable point. Joy is not a reward you receive after success, it is equipment you carry into the fight. Three **Joy Stimulants**:

1. **Daily gratitude** practice: write **3** things to God you are thankful for.
2. A **forward-looking, purpose-driven peer group**.
3. **Regular service to others**.

"The longer your face, the longer your way. Only excited people are licensed to excel."
(Dr. Oyedepo.)

FILL IN THE GAP

L5 S15

Strategy 2 says guard your joy, because it is a _____, not a _____. The three Joy Stimulants are daily gratitude, a forward-looking purpose-driven _____, and regular _____.

ANSWER weapon; luxury; peer group; service to others.

PICK ALL THAT APPLY

L5 S15

Which are listed as Joy Stimulants? (Select all that apply.)

- ☐ a Daily gratitude practice, writing 3 things to God you are thankful for
- ☐ b Regular service to others
- ☐ c Scheduled rest days with no work at all
- ☐ d A forward-looking, purpose-driven peer group

ANSWER **a, b and d**. Option c sounds healthy and is not on the slide. Notice that all three real stimulants are active, not restful: writing, choosing company, and serving.

TRUE OR FALSE

L5 S15

The lecture treats joy as a pleasant by-product of success, to be enjoyed once the goal is reached.

ANSWER **False**. Joy is **a weapon, not a luxury**, and you are told to **guard** it, which is language for something you carry and can lose, not something you win.

PERSEVERE: Lincoln's greatest lesson. The slide lists **Ab Lincoln's Record Before the Presidency** (that is Abraham Lincoln, written as the slide writes it):

- ▶ **Failed in business, twice**
- ▶ **Lost legislative races, multiple times**
- ▶ Suffered personal tragedies
- ▶ Widely dismissed as a political failure
- ▶ Then **elected 16th President of the United States**, and became arguably the greatest president in American history

The lesson: **your setback is not your final chapter. Keep writing.** Note how this closes the loop with Truth two of Strategy 1: every champion has marks of failure in their past record, and here is the record.

FILL IN THE GAP

L5 S16

Before the presidency, Lincoln failed in business _____ times, lost legislative races multiple times, and was widely dismissed as a political _____. He was then elected the _____ President of the United States.

ANSWER two; failure; 16th.

PICK ONE

L5 S16

What does the lecture draw from Lincoln's record before the presidency?

- ☐ a That political success depends mostly on timing and luck
- ☐ b That your setback is not your final chapter, so keep writing
- ☐ c That repeated failure is a sign you have chosen the wrong field
- ☐ d That business failure disqualifies a person from public office

ANSWER **b.** Option c is the exact belief the strategy exists to refute, and it is also the fixed mindset from Slide 13 reading failure as identity.

TEACH: STRATEGY 4, SPEAK YOUR DREAM

L5 S17

SPEAK YOUR DREAM: a closed mouth is a closed future. **Joseph's Principle** in three steps: he **told his dream**, which **caused immediate trouble**; the **trouble led to Egypt**, and **Egypt led to the palace**; therefore **the telling was the first step to the fulfilling**. The point is not that speaking is safe. It is that the trouble speaking caused was itself the route.

Then the research: people who **write goals and share them with an accountability partner** are **76% more likely to achieve them** (Dr. Gail Matthews).

● MUST MEMORISE

L5 S17

76% more likely to achieve goals: those who **write** goals **and share** them with an **accountability partner** (Dr. Gail Matthews). Joseph: telling caused trouble, trouble led to Egypt, Egypt led to the palace, so **the telling was the first step to the fulfilling**.

◆ **MEMORY HOOK: WRITE IT AND SAY IT, 76%. A CLOSED MOUTH IS A CLOSED FUTURE.**

⚠ TRAP

L5 S17

Two accountability numbers now live in this course and they are **not** interchangeable. Lecture 1 gives **95%** for goal completion when you have an accountability partner with regular check-ins. Lecture 5 gives **76%** more likely to achieve, for people who **write** goals **and share** them with an accountability partner (Dr. Gail Matthews). Different studies, different claims, and the exam tags each question with its lecture. Read the tag, then answer with that lecture's number.

FILL IN THE GAP

L5 S17

Strategy 4 is Speak Your Dream, because a closed mouth is a closed _____. Dr. Gail Matthews found that people who write goals and share them with an accountability partner are _____ more likely to achieve them. For Joseph, the _____ was the first step to the fulfilling.

ANSWER future; 76%; telling.

PICK ONE

L5 S17

Joseph told his dream and it caused immediate trouble. How does the lecture read that outcome?

- ☐ a As proof that dreams should be kept private until they are fulfilled
- ☐ b As a warning to share only with people who already support you
- ☐ c As the route itself: the trouble led to Egypt, Egypt led to the palace, so the telling was the first step to the fulfilling
- ☐ d As an unrelated misfortune that delayed the fulfilment

ANSWER **c.** The trouble was not a cost of speaking, it was the mechanism. Option a states the opposite of the strategy's own headline: a closed mouth is a closed future.

The 7-Step Personal Success Plan

TEACH: THE SEVEN STEPS

L5 S18

"Every purpose not pursued is sure to die." (Dr. Oyedepo.)

STEP	ACTION
1. Purpose	Write your one-sentence mission
2. Planning	Map your 4-year milestones
3. Programming	Block time on your calendar
4. Pursuit	Begin today, not tomorrow
5. Appraisal	Review every semester honestly
6. Perseverance	Expect setbacks; plan through them
7. Receive	Do not stop until the crown is yours

The slide closes with the sentence that reframes the whole course: **"You do not rise to the level of your goals. You fall to the level of your systems."** (James Clear.) That is Lecture 4's argument in one line, which is why Systems came before this lecture.

● MUST MEMORISE

L5 S18

The 7 steps in order: **Purpose, Planning, Programming, Pursuit, Appraisal, Perseverance, Receive.**

◆ **MEMORY HOOK: SIX P'S THEN RECEIVE. PURPOSE, PLANNING, PROGRAMMING, PURSUIT, APPRAISAL, PERSEVERANCE, AND FINALLY YOU RECEIVE.**

MATCH-UP

L5 S18

STEP	ACTION
Purpose	Write your one-sentence mission
Planning	Map your 4-year milestones
Programming	Block time on your calendar
Pursuit	Begin today, not tomorrow
Appraisal	Review every semester honestly
Perseverance	Expect setbacks; plan through them
Receive	Do not stop until the crown is yours

FILL IN THE GAP

L5 S18

Step 2 of the plan is _____: map your _____ milestones. Step 3 is Programming: _____. Step 5 is _____: review every semester honestly.

ANSWER Planning; 4-year; block time on your calendar; Appraisal.

TRUE OR FALSE

L5 S18

James Clear's line at the foot of the plan is that you rise to the level of your goals.

ANSWER **False.** It is the reverse, and the reversal is the whole point: "You do **not** rise to the level of your goals. You **fall** to the level of your systems."

TEACH: THE CONCLUSION, COMPOUNDING

L5 S19

Small disciplines compounded daily = Extraordinary Results. The arithmetic behind it, from *Atomic Habits*: **1% better every day = 37 times better in a year** (James Clear). That number is what makes Unit 1's argument financial rather than merely inspirational: the reason blow 49 is not wasted is that small daily increments compound.

FILL IN THE GAP

L5 S19

Atomic Habits shows that _____ better every day makes you _____ better in a year. Small disciplines compounded daily equal _____

.

ANSWER 1%; 37 times (37x); Extraordinary Results.

● MUST MEMORISE

L5 S14, S15, S16, S17

The four strategies for sustaining the fire, by name and headline: **RESIST** (build endurance like a soldier), **GUARD YOUR JOY** (a weapon, not a luxury), **PERSEVERE** (your setback is not your final chapter), **SPEAK YOUR DREAM** (a closed mouth is a closed future).

◆ **MEMORY HOOK: RESIST, GUARD, PERSEVERE, SPEAK. STAND, SMILE, STAY, SAY.**

MATCH-UP

L5 S14, S15, S16, S17

STRATEGY

ITS HEADLINE AND ANCHOR

Strategy 1: RESIST

Build endurance like a soldier; four truths about resistance

Strategy 2: GUARD YOUR JOY

It is a weapon, not a luxury; three joy stimulants

Strategy 3: PERSEVERE

Lincoln's record before the presidency

Strategy 4: SPEAK YOUR DREAM

A closed mouth is a closed future; Joseph's Principle

CLOZE SCENARIO

L5 S14, S16, S17, S18, S19

A student halfway through a four-year degree wants to quit. The lecture answers with Strategy 1: **{discouragement attacks hardest in the middle of the journey, opposition is proof you are moving, and the crown is on the other side of the endurance}**. It offers Lincoln as the case: **{he failed in business twice, lost legislative races repeatedly, was dismissed as a political failure, and was then elected 16th President of the United States}**. It gives him something to do today, from Strategy 4: **{write the goal and share it with an accountability partner, which makes him 76% more likely to achieve it}**. And it hands him the plan and its arithmetic: **{Purpose, Planning, Programming, Pursuit, Appraisal, Perseverance and Receive, since 1% better every day compounds to 37 times better in a year}**.

MARKED Four blanks, one mark each.

RECALL AND CHECK

Name the four strategies with their headlines, recite the seven steps in order, and give the compounding number.

ANSWER RESIST (endurance like a soldier), GUARD YOUR JOY (a weapon, not a luxury), PERSEVERE (your setback is not your final chapter), SPEAK YOUR DREAM (a closed mouth is a closed future). Purpose, Planning, Programming, Pursuit, Appraisal, Perseverance, Receive. 1% better daily equals 37 times better in a year.

THE REAL TEST

The TMC Test, Fully Worked

Every one of the thirty questions from the real computer-based test, reproduced in its exact style, with the correct answer marked and the reason it is correct. Attempt each before you read the answer.

Questions 1 to 15

Each question is tagged with its source lecture and marked out of 1. The five styles appear exactly as in the modules. Correct answers are shown in green.

Q1 · SINGLE MCQ

LECTURE 1

A software developer feels energized about becoming a senior architect but has not clearly articulated what that role looks like month-to-month. She knows the direction but struggles with what measurable evidence would prove progress. Which approach best addresses her situation?

- ☐ a Attend more leadership seminars and networking events to learn what senior architects do
- ☐ b Set a one-year deadline and let timeline pressure create the clarity she needs
- ☒ c **Separate her ambitious vision from measurable Key Results that prove progress, then tie Key Results to specific outcomes (not just activities)**
- ☐ d Write the goal daily and visualise it, as repetition will eventually clarify the steps

ANSWER

c. The problem is missing measurable evidence, which is exactly what OKRs supply: an Objective plus Key Results that prove it, and Key Results are outcomes, not activities.

Q2 · MULTIPLE RESPONSE

LECTURE 3

When mentoring a junior colleague on professional growth, which advice reflects the lecture's framework for sustainable career development? (Select all that apply.)

- ☒ a **"Build your reputation in ordinary moments through reliability and integrity, not just visible wins"**
- ☒ b **"Don't wait to be assigned a mentor, pursue one actively and demonstrate you're already moving forward"**
- ☐ c "Promote your full range of capabilities equally to show versatility"
- ☐ d "Focus only on visible accomplishments where others will notice"

ANSWER

a and b. Reputations are built in ordinary moments; mentors are pursued, not awaited. c fails positioning (known for many = memorable for none); d ignores that the greatest threat is invisibility, not lack of drama.

Q3 · MATCHING

LECTURE 3

Match each action to the principle it represents.

ACTION	CORRECT PRINCIPLE
Saying no to opportunities outside her domain to maintain focus and recall	Depth of Focus
Developing genuine relationships with people doing meaningful work, not just collecting contacts	Networking as Cultivation
Consistently delivering excellence and integrity even when no one is watching	Brand Bank Deposits
Choosing one area where she wants to be the go-to expert	Niche as Launch Pad

Q4 · MULTIPLE RESPONSE

LECTURE 2

The lecture connects belief/attitude and creative capability. Which statements reflect this accurately? (Select all that apply.)

- ☐ a Positive thinking is purely psychological and has no neurological basis
- ☐ b Fear should be "managed" through acceptance rather than actively replaced
- ☒ c **The SWITCH protocol works by building new neural structures, not just by positive thinking as placebo**
- ☒ d **When fear neurologically suppresses the prefrontal cortex, creative thinking capacity itself is diminished**

ANSWER

c and d. Thought physically rewires the brain (so a is false), and fear is replaced, not managed (so b is false).

Q5 · TRUE / FALSE

LECTURE 1

A manager runs quarterly 12-Week Year cycles instead of one annual plan. By the lecture's teaching on urgency and time perception, this is likely to increase follow-through and reduce procrastination.

True / False

ANSWER

True. Four fresh starts a year keep urgency psychologically active, which is the whole purpose of the framework.

Q6 · MATCHING

LECTURE 1

Match each description to the correct OKR component.

DESCRIPTION	COMPONENT
Describes the effort put in; not measurable evidence of progress	Activity (vs. KR)
The statement that remains stable across 12-week cycles and provides motivation	Vision
Specific, measurable outcomes that prove the Objective was achieved	Key Results
Bold, inspiring, qualitative statement answering "Where am I going?"	Objective

Q7 · CLOZE

LECTURE 1

A student who consistently misses self-imposed deadlines learns that **[1]**. Her Implementation Intention is structured as **[2]**. The **[3]**. Research shows that **[4]**.

ANSWER

[1] Implementation Intentions use a specific formula to pre-decide behaviour so the future self doesn't negotiate in the moment. **[2]** "When [I sit down at my desk on Monday at 6 PM], I will [complete my weekly planning worksheet]". **[3]** cue must be concrete (a time, place, or completed action), not vague or emotional. **[4]** people who specified when and where they would act followed through 71% of the time (vs. 32% with intention only).

Q8 · MULTIPLE RESPONSE

LECTURE 2

An athlete feels doubt about winning. Which interventions align with the lecture's prescriptions for rewiring doubt? (Select all that apply.)

- ☐ a) Avoiding competitive events until confidence naturally builds over time
- ☒ b) **Deliberately practising visualisation of success to prime the brain for the result before it arrives**
- ☒ c) **Using the SWITCH protocol to externalise doubts and replace them with rehearsed positive self-talk**
- ☐ d) Assuming the doubt is just an emotion that will fade on its own

ANSWER

b and c. Insight and confidence are prepared for, not waited for; a and d are passive waiting.

A newly hired department head is designing systems for her team's success. She knows they need **[1]**. She implements this by **[2]**. She also ensures they have **[3]**. She further addresses **[4]**.

ANSWER

[1] a clear vision with precision (specific targets to run toward, not vague directions). **[2]** establishing written quarterly goals where each person knows exactly what they are after. **[3]** the right tools and knowledge (Kit 4) to accomplish their domain-specific work. **[4]** Kit 5 (timing for when execution will be most effective) and Kit 6 (persistent tillage for sustainable results).

Match each concept to the intervention or principle it describes.

CONCEPT	PRINCIPLE
Fear suppresses the prefrontal cortex; creative thinking requires an active, exploratory mind	Fear-Creativity Link
The subconscious accepts what is repeatedly impressed upon it; affirmation rewires belief	Subconscious Programming
Fear is not a feeling to be managed; it is a cognitive stance to be replaced	Active Replacement (not Management)
The state of mind that enables exploration and possibility; incompatible with fear	Spirit of Possibility

When an entrepreneur considers launching a venture without proper preparation, the lecture's teaching suggests **[1]**. The lecture's practical advice is **[2]**. The Spanner metaphor **[3]**. The King metaphor **[4]**.

ANSWER

[1] this approach is like going to war without arms, you will expend effort but achieve nothing. **[2]** acquire the tools (knowledge, mentors, resources, proven frameworks) no matter the cost of obtaining them. **[3]** illustrates that trying a task without the right tool causes wasted effort. **[4]** teaches that a wise leader consults and prepares before committing to battle.

Q12 · MATCHING

LECTURE 4

Match each element to its description.

DESCRIPTION	ELEMENT
Persistent, humble cultivation and hard work, allowing results to grow over time	Kit 6: Tillage
The clear, specific target you are running toward (not fighting the air)	Vision with Precision
Understanding that seasons change and readiness must align with action timing	Kit 5: Timing
Acquiring the specific tools, knowledge, and resources needed for your chosen domain	Kit 4: Tools

Q13 · SINGLE MCQ

LECTURE 2

A manager struggles with delegating because she fears her team "won't do it right." The W.I.S.E. model suggests that before she can execute effectively, what must happen first?

- a Her spirit (belief system) must be realigned through deliberate rewiring so that faith in her team's capability can emerge**
- b She must acquire more advanced training in management delegation techniques
- c She should simply push through the fear and delegate anyway to build courage gradually
- d Her team must be replaced with more competent individuals

ANSWER

a. Fear is a cognitive stance to be dismantled first (the Spirit stage), not pushed through or out-trained.

Q14 · TRUE / FALSE

LECTURE 1

A student uses the "When-Then" protocol: "When I feel stressed about my assignment, then I will take a 5-minute break." This is correctly structured because the cue is concrete and the behaviour is specified.

True / **False**

ANSWER

False. "When I feel stressed" is an emotional cue, not a concrete one. A valid cue is a time, place, or completed action.

Kit 5 in the systems framework addresses [1]. The lecture teaches that [2]. Jesus' own teaching in the New Testament models this: [3]. The principle is that [4].

ANSWER

[1] Timing, understanding the seasons and readiness for when execution will be most effective. [2] to every thing there is a season, and right timing is a major asset. [3] he said "Mine hour is not yet come" at Cana, and with Lazarus he waited two days so the outcome would be resurrection, not healing. [4] until the time is ripe, do not step out, right timing is a major asset.

THE REAL TEST

Questions 16 to 30

The second half. Questions 17 and 26 are the two long Adaeze OKR cloze items; know her numbers cold (0.75 on posts, 0.5 on mentors, 0.76 overall, Strong).

An ambitious student has a compelling vision and strong work ethic but keeps shifting priorities based on what is trending. His mentor observes: "You're fighting the air instead of running at the tape." What is this pointing to?

- ☐ a He is not reading enough industry publications to stay informed
- ☐ b His work ethic is insufficient compared to more successful peers
- ☐ c He lacks the networking connections to succeed in his field
- ☒ d **The absence of a clear, written goal that targets a specific outcome, so actions lack aim and dissipate effort**

ANSWER

d. Without a target you copy what is popular and fight the air instead of running at the tape.

Adaeze, a 300-level Mass Communications student, sets this OKR: "Objective: Establish myself as a credible emerging voice in digital media by end of academic year." Her [1]. At quarter-end, she scores herself: [2]. Her [3]. This scoring method [4].

ANSWER

[1] Key Results include publishing 12 posts with minimum 200 views each and securing 2 active industry mentors. **[2]** "Posts KR was 0.75 (published 9 of 12), Mentors KR was 0.5 (found 1 of 2)". **[3]** overall end-of-quarter score was 0.76 (Strong), reflecting weighted performance across all KRs. **[4]** replaces vague guilt with a structured conversation about what changes next quarter.

Q18 · SINGLE MCQ

LECTURE 1

A project manager uses the 12-Week Year framework. Why does the lecture emphasise compressing goals into 12-week cycles rather than annual ones?

- ☐ a Short cycles force lower-quality decisions because there's insufficient planning time
- ☐ b 12 weeks is the scientifically optimal duration for all human goal-setting
- ☒ c **When timelines are short and repeated, urgency remains psychologically active; annual timelines allow procrastination because the brain perceives abundance of time**
- ☐ d Annual goals are outdated and should never be used

ANSWER

c. The mechanism is urgency and time perception, not that 12 weeks is magic or that annual plans are forbidden.

Q19 · TRUE / FALSE

LECTURE 1

A team member sets this goal: "I will increase team productivity by implementing daily check-ins and running three productivity workshops." This goal is well-structured because it specifies clear actions that describe what changes as evidence of progress.
True / **False**

ANSWER

False. Daily check-ins and running workshops are activities, not Key Results. They describe what you do, not what changes as measurable evidence.

Q20 · CLOZE

LECTURE 3

The lecture teaches that **[1]**. This is because the **[2]**. Therefore, the **[3]**.

ANSWER

[1] choosing a niche is a launch pad (not a limitation) that allows you to build depth and become sought-after. **[2]** answer determines your positioning strategy, visibility in the market, and whether you are remembered for something specific. **[3]** critical question before graduation is: "What is the one area within my field where I want to be the go-to person?"

Q21 · CLOZE

LECTURE 4

An ambitious entrepreneur has studied his field, invested in tools, and prepared extensively. Yet he hasn't launched because he's waiting for "the perfect time." The lecture addresses this delay with a direct principle: **[1]**. The lecture further warns that **[2]**. A football match **[3]**. The **[4]**.

ANSWER

[1] without a clear goal or target, you have nothing to aim at; you fight the air instead of running at the tape. **[2]** when you lack a written goal, you unconsciously copy what is popular or what others do. **[3]** without goalposts never ends, just as success without clear targets is impossible to achieve. **[4]** lecture advises running with the tape as your target, with precision.

Q22 · MULTIPLE RESPONSE

LECTURE 3

A recent graduate is deciding between two career paths. Which considerations align with the lecture's positioning framework for building a memorable professional identity? (Select all that apply.)

- ☐ a Specialising too early before she has enough experience
- ☒ b **Cultivating relationships with people doing work that matters, not just collecting contacts**
- ☐ c Building brand visibility through dramatic public gestures rather than consistent daily excellence
- ☒ d **Selecting one domain where she wants depth and expertise, not spreading herself thin across multiple areas**

ANSWER

b and d. a is the trap: the framework encourages specialisation (a niche is a launch pad); c contradicts the Brand Bank (built in ordinary moments).

Q23 · MATCHING

LECTURE 2

Match each teaching source to its core contribution to creative problem-solving.

CONTRIBUTION	SOURCE
Describes the unified approach combining wisdom, instruction, spirit, and execution	W.I.S.E. Model
Emphasises that belief and experience are causally linked; fear and faith cannot coexist	Norman Vincent Peale
Teaches the 21-day protocol for actively rewiring toxic thoughts into productive beliefs	SWITCH Protocol
Identifies that fear neurologically suppresses the prefrontal cortex (creative centre)	Dr. Caroline Leaf

Q24 · TRUE / FALSE

LECTURE 3

The lecture argues that specialising too early or focusing on one domain is a limitation that prevents career growth and should be avoided until someone gains broader experience across multiple fields.

True / **False**

ANSWER

False. A niche is a launch pad, not a limitation. The specialist is sought after; the generalist is merely available.

Q25 · SINGLE MCQ

LECTURE 3

A freelancer consistently delivers excellent work, meets deadlines, and treats everyone professionally. Yet two years in, she hasn't been referred and must chase every new client. Using the Brand Bank Account model, what is most likely happening?

- ☐ a She should lower her prices to become more attractive
- ☐ b She is not actually delivering quality work despite her perception
- ☐ c The market simply doesn't value the services she offers
- ☒ d **Her deposits are strong but invisible; she has built a reputation only with those she directly works with, not the broader market that could refer her**

ANSWER

d. The greatest threat to a brand is invisibility, not failure. Strong deposits, no visibility.

Q26 · CLOZE

LECTURE 1

When Adaeze reviewed her quarterly OKR scores, she found that **[1]**. This scoring method **[2]**. Her **[3]**. Therefore, **[4]**.

ANSWER

[1] some Key Results were 0.75 (published 9 posts of 12) and some were 1.0 (internship completed), creating a nuanced overall score of 0.76. **[2]** allows for a structured conversation about what changes next quarter (rather than vague guilt or shame). **[3]** end-of-quarter score of 0.76 (Strong) reflected weighted performance, showing substantial progress even where full achievement wasn't reached. **[4]** the scoring system replaces vague guilt with structured conversation and enables continuous improvement.

Q27 · CLOZE

LECTURE 4

The lecture emphasises that **[1]**. This applies practically when **[2]**. Therefore, **[3]**. The **[4]**.

ANSWER

[1] without a goal, you cannot score one (like a football match without goalposts never ends). **[2]** a person starts a crusade, another opens a shop, a third returns to school, and without a personal target you unconsciously follow all of them (becoming disjointed). **[3]** always asking "What am I actually after?" is essential for maintaining coherent direction. **[4]** lecture advises running with the tape as your target, with precision.

Q28 · MULTIPLE RESPONSE

LECTURE 3

A professional is building her personal brand. Which activities constitute effective "deposits" into her Brand Bank Account? (Select all that apply.)

- ☐ a Making frequent grand public announcements about her accomplishments
- ☐ b Only focusing on high-visibility tasks that gain external recognition
- ☒ c **Delivering committed work on time and with excellence on every project, not just visible ones**
- ☒ d **Maintaining integrity when no one is watching and treating "unimportant" people with respect**

ANSWER

c and d. Reputations are built in the ordinary moments, not the dramatic ones.

Q29 · CLOZE

LECTURE 2

When someone applies the SWITCH protocol to a fear-based thought, they move through six steps. After **[1]**. Next, they **[2]**. Finally, they **[3]**. The **[4]**.

ANSWER

[1] Gathering awareness and conducting Focused Reflection on the root cause, they Write the thought to externalise it. **[2]** Revisit the pattern to see connections and understand context, then engage in Active Reach to deliberately choose and rehearse the replacement thought. **[3]** Celebrate their growth and reinforce the new pathway through acknowledgment. **[4]** entire protocol is designed to build new neural structures through deliberate practice and repetition.

Q30 · TRUE / FALSE

LECTURE 2

A person has been told to "think positively" about a work challenge, and she repeats daily affirmations for motivation. The lecture's SWITCH Protocol would suggest this approach is sufficient for rewiring the underlying fear-based thinking pattern that blocks her creativity.

True / **False**

ANSWER

False. Affirmations alone are not enough. SWITCH is a full six-step rewiring protocol that builds new neural structures, not motivational self-talk.

● MUST MEMORISE

WHOLE TEST

Across all 30, the answer is always the option that matches the slide's exact distinction: a Key Result is not an activity, fear is replaced not managed, a niche is a launch pad not a limitation, a cue must be concrete not emotional, and success needs a target plus timing plus tillage plus tarrying.

◆ **MEMORY HOOK: WHEN TWO ANSWERS FEEL RIGHT, PICK THE ONE THE SLIDE WOULD SAY.**

MOCK EXAMINATION ONE

Sit This Under Exam Conditions

Twenty-five questions, all five styles, weighted across the five lectures, each marked out of 1. Give yourself about 25 minutes and no notes. Answers follow on their own page: do not look until you have finished.

Question Paper

Q1 · SINGLE MCQ

LECTURE 1

"I plan to start saving this year." Which level of aspiration is this?

- ☐ a Wish
- ☐ b Dream
- ☐ c Intention
- ☐ d Goal

Q2 · MULTIPLE RESPONSE

LECTURE 1

Which are among the six achievement strategies for sustaining goals when motivation fades? (Select all that apply.)

- ☐ a Habit stacking
- ☐ b Temptation bundling
- ☐ c Relying on willpower alone
- ☐ d Accountability

Q3 · MATCHING

LECTURE 1

Match each framework to the problem it solves.

FRAMEWORK	PROBLEM
SMART+ER	?
OKRs	?
12-Week Year	?
Implementation Intentions	?

Options: no measurable evidence; no structure or emotional connection; motivation with no trigger to act; annual planning that kills urgency.

Q4 · TRUE / FALSE

LECTURE 1

An identity goal ("I am becoming the kind of person who shows up consistently") works because, once the goal becomes your identity, behaviour follows without negotiation.
True / False

Q5 · CLOZE

LECTURE 1

WOOP has four steps. First you state your **[1]** clearly. Then you vividly picture the **[2]**. Then you name your biggest **[3]** obstacle honestly. Finally you write the if-then **[4]**.

Q6 · SINGLE MCQ**LECTURE 2**

On the Knowledge-Wisdom Ladder, which statement is correct?

- ☐ a Information is the top rung most people reach
- ☐ b Wisdom is applying knowledge to produce results, the rung most people never reach
- ☐ c Knowledge and wisdom are the same rung
- ☐ d Wisdom is simply gathering more information

Q7 · MATCHING**LECTURE 2**

Match each author to their book.

AUTHOR	BOOK
Dr. David Oyedepo	?
Dr. Caroline Leaf	?
Norman Vincent Peale	?
Edward de Bono	?
James Webb Young	?

Options: Lateral Thinking; The Power of Positive Thinking; Winning Wisdom; A Technique for Producing Ideas; Switch On Your Brain.

Q8 · MULTIPLE RESPONSE**LECTURE 2**

Which are among the five convictions all five authors share? (Select all that apply.)

- ☐ a The mind is primary
- ☐ b Intelligence is fixed and cannot be developed
- ☐ c Insight is prepared for, not waited for
- ☐ d Discomfort is part of the process

Q9 · TRUE / FALSE**LECTURE 2**

According to Dr. Oyedepo, wisdom is chiefly a matter of thinking harder, researching more, and being more disciplined.

True / False

Q10 · CLOZE**LECTURE 2**

Young's five-step process runs: Gather raw material, **[1]** the material, **[2]** the problem so the subconscious works, capture the **[3]** moment, then **[4]** and develop the idea.

Q11 · SINGLE MCQ

LECTURE 3

The lecture says packaging is:

- ☐ a Deception, when done well
- ☐ b Translation, not deception
- ☐ c Only about how you dress
- ☐ d Unnecessary if your character is strong

Q12 · MATCHING

LECTURE 3

Classify each as a Brand Bank **Deposit** or **Withdrawal**.

ITEM	DEPOSIT OR WITHDRAWAL?
Integrity under pressure	?
Public negativity	?
Fulfilled promises	?
Treating "unimportant" people poorly	?

Q13 · MULTIPLE RESPONSE

LECTURE 3

Which belong on a LinkedIn profile at minimum? (Select all that apply.)

- ☐ a A professional headshot
- ☐ b A summary communicating vision and value
- ☐ c Every old post kept forever
- ☐ d A headline that captures your brand, not just your degree

Q14 · TRUE / FALSE

LECTURE 3

In personal branding, silence is a safe, neutral position that protects your brand.
True / False

Q15 · CLOZE

LECTURE 3

You are not competing for jobs; you are competing for **[1]**. The positioning chain runs Depth of Focus, then **[2]**, then **[3]**, then **[4]**.

Q16 · SINGLE MCQ

LECTURE 4

Which best defines a "system" in this lecture?

- ☐ a Working as hard as possible
- ☐ b Parts working together to deliver a guaranteed result
- ☐ c Waiting for luck to align
- ☐ d A single powerful habit

Q17 · MATCHING**LECTURE 4**

Match each Kit to its question.

KIT	QUESTION
Task	?
Tools	?
Timing	?
Tarrying	?

Options: When do I step out? Am I bound to this? Will I wait for it? What do I need in my hand?

Q18 · MULTIPLE RESPONSE**LECTURE 4**

A target must be which of the following? (Select all that apply.)

- ☐ a Specific
- ☐ b Popular
- ☐ c Quantifiable
- ☐ d Yours

Q19 · TRUE / FALSE**LECTURE 4**

In the Attempt mindset, "this must work" and no retreat is available.
True / False

Q20 · CLOZE**LECTURE 4**

Kit 6 is Tillage. The Foolish Farmer throws seed on **[1]** ground and harvests nothing; the Oil Well shows everything precious requires **[2]**. Kit 7 is Tarrying; every great manifestation requires a **[3]** period, and the wall falls at the **[4]** blow.

Q21 · SINGLE MCQ**LECTURE 5**

Which is the lecture's definition of discouragement?

- ☐ a A sudden loss of ability brought on by repeated failure
- ☐ b The gradual withdrawal of the courage to continue
- ☐ c The natural emotional cost of setting goals that are too ambitious
- ☐ d A season of low motivation that passes on its own within weeks

Q22 · MULTIPLE RESPONSE
LECTURE 5

Which does the lecture list as something vision gives you? (Select all that apply.)

- ☐ a Direction, you know where you are going
- ☐ b Endurance, you can withstand pain when the destination is worth it
- ☐ c Immunity, you no longer meet opposition
- ☐ d Motivation, you know why you are going there

Q23 · MATCHING
LECTURE 5

Match each incomplete combination of the Three Pillars to where the lecture says it ends.

COMBINATION	ENDS IN
Information without hard work	?
Hard work without vision	?
Vision without information	?

Options: Exhaustion; Stagnation; Frustration.

Q24 · TRUE / FALSE
LECTURE 5

Duckworth's research found that IQ, talent and social class each predicted success reliably, and that grit merely reinforced them.

True / False

Q25 · CLOZE
LECTURE 5

The Sledgehammer Principle: blow 10 is nothing, blow 30 is nothing, blow **[1]** is nothing, and at blow **[2]** the wall collapses. But it was not that final blow that brought it down, it was the **[3]** force of all the blows before it, which means the results you cannot see today are being built by the **[4]** you are doing now.

MOCK EXAMINATION ONE

Answers

Mark your paper honestly, one mark per question. Read the reason for every one you missed, then find the matching Teach box in the modules.

Q1 TO Q5 · LECTURE 1

Q1

c, Intention. It states a plan but has no commitment or measure. (Wish = no direction; Dream = indefinite; Goal = specific, measurable, time-bound.)

Q2

a, b and d. The six strategies are habit stacking, temptation bundling, the 2-minute rule, the progress principle, accountability, and WOOP. Relying on willpower alone is the losing strategy the strategies replace.

Q3

SMART+ER = no structure or emotional connection; OKRs = no measurable evidence; 12-Week Year = annual planning that kills urgency; Implementation Intentions = motivation with no trigger to act.

Q4

True. When the goal becomes your identity, behaviour follows without negotiation.

Q5

[1] Wish, [2] Outcome, [3] internal, [4] Plan.

Q6 TO Q10 · LECTURE 2

Q6

b. Wisdom, applying knowledge to produce results, is the rung most people never reach. Information is where most begin.

Q7

Oyedepo = Winning Wisdom; Leaf = Switch On Your Brain; Peale = The Power of Positive Thinking; de Bono = Lateral Thinking; Young = A Technique for Producing Ideas.

Q8

a, c and d. The fifth conviction is that patterns of thought *can* be changed and intelligence is developed, not fixed, so b is false.

Q9

False. Wisdom is *not* thinking harder, researching more, or being more disciplined; it is the application of knowledge.

Q10

[1] Digest, [2] Drop, [3] Eureka, [4] Shape.

Q11 TO Q15 · LECTURE 3

Q11

b. Packaging is translation, not deception.

Q12

Integrity under pressure = Deposit; Public negativity = Withdrawal; Fulfilled promises = Deposit; Treating "unimportant" people poorly = Withdrawal.

Q13

a, b and d. Old posts are brand liabilities, so c is wrong; digital hygiene is brand hygiene.

Q14

False. Silence is not neutrality, it is invisibility.

Q15

[1] Mindshare, [2] Distinction, [3] Recall, [4] Opportunity.

Q16 TO Q20 · LECTURE 4

Q16

b. A system is parts working together to deliver a guaranteed result.

Q17

Task = Am I bound to this?; Tools = What do I need in my hand?; Timing = When do I step out?; Tarrying = Will I wait for it?

Q18

a, c and d. A target must be Specific, Defined, Quantifiable, and Yours. "Popular" is the opposite: without a target you copy what is popular.

Q19

False. "This must work" and no retreat is the *Task* mindset, not the *Attempt* mindset.

Q20

[1] unploughed, [2] pressure, [3] gestation, [4] 50th.

Q21

b. The gradual withdrawal of the courage to continue. Note what it is not: it withdraws courage, not ability, and it is gradual, which is why the lecture calls it a slow leak. Option d contradicts that by making it self-correcting.

Q22

a, b and d. Vision gives Direction (where), Motivation (why) and Endurance (withstand pain when the destination is worth it). "Immunity" is invented, and Strategy 1 says the opposite: opposition is proof you are moving.

Q23

Information without hard work = Frustration; hard work without vision = Exhaustion; vision without information = Stagnation.

Q24

False. IQ, talent and social class are precisely the three the research ruled out. Grit was the *only* consistent predictor across all high achievers.

Q25

[1] 49, [2] 50, [3] cumulative, [4] work.

MOCK EXAMINATION TWO

Sit This One After the First

A fresh twenty-five questions on different facts from the same five lectures. Same rules: 25 minutes, no notes, all five styles, one mark each.

Question Paper

Q1 · SINGLE MCQ

LECTURE 1

"Win the department prize." Which type of goal is this, and what is its weakness?

- ☐ a Process goal; too much within your control
- ☐ b Outcome goal; motivating but outside your daily control, dangerous alone
- ☐ c Identity goal; it changes who you are
- ☐ d Intention; it has a measure

Q2 · MULTIPLE RESPONSE

LECTURE 1

Which are the three reasons goals fail, per the psychology of achievement? (Select all that apply.)

- ☐ a Planning Fallacy
- ☐ b Laziness
- ☐ c Motivation Decay
- ☐ d Willpower Depletion

Q3 · MATCHING

LECTURE 1

Match each failure force to its fix.

FORCE	FIX
Planning Fallacy	?
Motivation Decay	?
Willpower Depletion	?

Options: design the environment so the right behaviour needs least resistance; add a 40% buffer and work backwards; design the system for the middle (weeks 3 to 8), not the launch.

Q4 · TRUE / FALSE

LECTURE 1

The Planning Fallacy is fixed by adding a 40% time buffer and working backwards from the deadline.

True / False

Q5 · CLOZE

LECTURE 1

An Implementation Intention follows the formula "When **[1]**, I will **[2]**," where the cue must be **[3]**. In the research, people who specified when and where followed through **[4]** of the time, versus 32% with intention only.

Q6 · SINGLE MCQ**LECTURE 2**

In the W.I.S.E. Model, which stage and source "fuels the engine"?

- ☐ a Wisdom, Oyedepo
- ☐ b Inner Architecture, Leaf
- ☐ c Spirit of Possibility, Peale
- ☐ d Execution, de Bono

Q7 · MATCHING**LECTURE 2**

Match each W.I.S.E. stage to the question it answers.

STAGE	QUESTION
W, Wisdom	?
I, Inner Architecture	?
S, Spirit of Possibility	?
E, Execution	?

Options: How do I build a mind that can receive it? How do I channel it into solutions? Where does true insight begin? What attitude enables me to act on it?

Q8 · MULTIPLE RESPONSE**LECTURE 2**

Which are de Bono's four lateral-thinking techniques? (Select all that apply.)

- ☐ a Random Entry
- ☐ b The Provocative Operation (Po)
- ☐ c The 2-Minute Rule
- ☐ d The Six Thinking Hats

Q9 · TRUE / FALSE**LECTURE 2**

The SWITCH Protocol is a 21-day process that literally builds new neural structures, not merely motivational self-talk.

True / False

Q10 · CLOZE**LECTURE 2**

Two of Peale's five principles: the subconscious accepts what is repeatedly **[1]** upon it; and you must empty the mind of **[2]**, because fear and **[3]** cannot coexist. Vivid mental **[4]** primes the brain for the result before it arrives.

Q11 · SINGLE MCQ**LECTURE 3**

In the Tunde and Emeka problem, what was the decisive difference between the two 2:1 graduates?

- ☐ a Their final grades
- ☐ b Their university
- ☐ c Professional visibility: one had built a brand, the other had none
- ☐ d Their intelligence

Q12 · MATCHING**LECTURE 3**

Match each Self-Audit question to what it reveals.

QUESTION	REVEALS
What do I do exceptionally well?	?
What do I care about deeply?	?
What do others consistently say about me?	?
Where do I want to go?	?

Options: brand energy; strategic direction; zone of strength; external reality.

Q13 · MULTIPLE RESPONSE**LECTURE 3**

Which are the three dimensions of the inner brand? (Select all that apply.)

- ☐ a Clarify your Values
- ☐ b Character Consistency
- ☐ c Competence Depth
- ☐ d Public Visibility

Q14 · TRUE / FALSE**LECTURE 3**

A niche is a launch pad, not a limitation: the specialist is sought after while the generalist is merely available.

True / False

Q15 · CLOZE**LECTURE 3**

The Cup analogy teaches: first clean the **[1]** of the cup. A brand built on performance without **[2]** collapses under scrutiny. Before packaging there must be something worth **[3]**, because brand output is **[4]**, and fruit does not lie about the tree.

Q16 · SINGLE MCQ**LECTURE 4**

Kit 2 is Training. Which statement matches the lecture?

- ☐ a Formal training delivers the goods; informal sets the pace
- ☐ b Formal training sets the pace; informal (personal development) delivers the goods
- ☐ c Only formal training matters
- ☐ d Training has nothing to do with placement

Q17 · MATCHING**LECTURE 4**

Match each figure to the point the lecture makes with them.

FIGURE	POINT
Benjamin Franklin	?
Richard Branson	?
Oral Roberts	?

Options: school drop-out who built the Virgin empire; left school at 10, framed the U.S. Constitution and founded a university; high school only, founded a leading Christian University.

Q18 · MULTIPLE RESPONSE**LECTURE 4**

Which are among the four practical disciplines for discerning timing? (Select all that apply.)

- ☐ a Ask God sincerely with a clear heart
- ☐ b Remove distractions and expect to hear
- ☐ c Act immediately in every situation regardless of season
- ☐ d Be sensitive to your environment; resources are often right in your room

Q19 · TRUE / FALSE**LECTURE 4**

In Kit 6, the lecture warns that hard work kills, so it is safest to work as little as possible.

True / False

Q20 · CLOZE**LECTURE 4**

Kit 4 is Tools. Trying a task without tools is like going to **[1]**. The Spanner shows there is a particular **[2]** for the job. The King (Luke 14:31) shows a wise leader **[3]** before going to war. So equip the **[4]** before you attempt the harvest.

Q21 · SINGLE MCQ**LECTURE 5**

The Precision Test says a goal must be Specific, Measurable, Time-bound and one more thing. Which, and why does it matter?

- ☐ a Achievable, because a goal beyond reach demotivates
- ☐ b Written, because if it is not written it is a wish
- ☐ c Popular, because support makes goals easier to keep
- ☐ d Relevant, because it must fit your wider plan

Q22 · MATCHING**LECTURE 5**

Label each statement Fixed Mindset or Growth Mindset.

STATEMENT	MINDSET
"I haven't mastered this yet"	?
Failure = who I am	?
Embraces challenge	?
"I'm just not smart enough"	?

Options: Growth Mindset; Fixed Mindset.

Q23 · MULTIPLE RESPONSE**LECTURE 5**

Which are among the Four Truths About Resistance? (Select all that apply.)

- ☐ a Discouragement attacks hardest in the middle of the journey
- ☐ b Every champion has marks of failure in their past record
- ☐ c Opposition is a signal that the goal was chosen wrongly
- ☐ d The crown is on the other side of the endurance

Q24 · TRUE / FALSE**LECTURE 5**

Strategy 2 treats joy as a weapon rather than a luxury, and lists daily gratitude, a forward-looking purpose-driven peer group, and regular service to others as its stimulants.

True / False

Q25 · CLOZE**LECTURE 5**

Pillar 2 is Information. Under the 1% Rule, reading **[1]** books for 20 to 30 minutes a day yields **[2]** books a year and **[3]** books over four years of university. The lecture's two biblical models of lifelong learning are Daniel, relevant under 3 kings for **[4]** years, and Paul, who asked for the books.

Answers

One mark per question. Anything you miss, trace back to its module Teach box.

Q1 TO Q5 · LECTURE 1

Q1

b. An outcome goal: motivating but outside your daily control, and dangerous when relied on alone.

Q2

a, c and d. The three are Planning Fallacy, Motivation Decay, and Willpower Depletion. Laziness is explicitly not one of them.

Q3

Planning Fallacy = add a 40% buffer and work backwards; Motivation Decay = design the system for the middle (weeks 3 to 8); Willpower Depletion = design the environment so the right behaviour needs least resistance.

Q4

True.

Q5

[1] a concrete cue occurs, [2] the specific behaviour, [3] concrete (a time, place, or completed action), [4] 71%.

Q6 TO Q10 · LECTURE 2

Q6

c. Spirit of Possibility (Peale) fuels the engine.

Q7

W = Where does true insight begin?; I = How do I build a mind that can receive it?; S = What attitude enables me to act on it?; E = How do I channel it into solutions?

Q8

a, b and d. The four are Random Entry, the Provocative Operation (Po), Challenge Assumptions, and the Six Thinking Hats. The 2-Minute Rule is from Lecture 1.

Q9

True.

Q10

[1] impressed, [2] fear, [3] faith, [4] rehearsal (visualisation).

Q11 TO Q15 · LECTURE 3

Q11

c. Grades were equal; visibility was not. One had built professional visibility, the other had zero.

Q12

Do well = zone of strength; care about = brand energy; others say = external reality; want to go = strategic direction.

Q13

a, b and c. Values, Character Consistency, Competence Depth. "Public Visibility" is not one of the three inner dimensions.

Q14

True.

Q15

[1] inside, [2] substance, [3] packaging, [4] fruit.

Q16 TO Q20 · LECTURE 4

Q16

b. Formal sets the pace; informal (personal development) delivers the goods. Your training determines your placement.

Q17

Franklin = left school at 10, framed the U.S. Constitution and founded a university; Branson = school drop-out who built the Virgin empire; Oral Roberts = high school only, founded a leading Christian University.

Q18

a, b and d. The fourth discipline is "once green-lit, refuse contrary thoughts." Acting immediately regardless of season is the opposite of discerning timing, so c is wrong.

Q19

False. Hard work never kills, it only refines; nothing kills like idleness.

Q20

[1] war without arms, [2] tool, [3] consults and prepares, [4] hand.

Q21

b. Written. Options a and d are Achievable and Relevant, which belong to SMART in Lecture 1 and are *not* in the Precision Test. That is the cross-lecture swap this question is built on.

Q22

"I haven't mastered this yet" = Growth; Failure = who I am = Fixed; Embraces challenge = Growth; "I'm just not smart enough" = Fixed.

Q23

a, b and d. The remaining truth is that opposition is *not* a sign to stop, it is proof you are moving, so c states the reverse.

Q24

True. All three stimulants are listed, and joy is explicitly a weapon, not a luxury.

Q25

[1] non-academic, [2] 12 to 18, [3] 48 to 72, [4] 65.

MOCK EXAMINATION THREE

One More, To Be Sure

The last twenty-five. If you can clear this one cold, you are ready. All five styles, five lectures, one mark each, 25 minutes.

Question Paper

Q1 · SINGLE MCQ

LECTURE 1

An OKR is made of which two parts?

- ☐ a An Objective (qualitative) and 2 to 4 Key Results (measurable)
- ☐ b A wish and a deadline
- ☐ c A list of daily activities and a scorecard
- ☐ d A vision and a habit

Q2 · MULTIPLE RESPONSE

LECTURE 1

Which are the two letters SMART+ER adds, and what do they do? (Select all that apply.)

- ☐ a E for Exciting: internal fuel, would you do it with no one watching?
- ☐ b R for Reviewed: a scheduled progress check that builds accountability
- ☐ c E for Easy: the goal should require no effort
- ☐ d R for Random: pick goals at random

Q3 · MATCHING

LECTURE 1

Match each Goal Stack layer to its timeframe.

LAYER	TIMEFRAME
Life Vision	?
Strategic Goals	?
Quarterly Targets	?
Weekly Actions	?

Options: 12 weeks; 7 days; 10 to 20 years; 1 to 3 years.

Q4 · TRUE / FALSE

LECTURE 1

In the 12-Week Year, the Weekly Scorecard target is 85% or more of planned actions completed.

True / False

Q5 · CLOZE

LECTURE 1

Research on achievement strategies: temptation bundling raised exercise by **[1]** when paired with audiobooks; a structured accountability partner raises goal completion to **[2]**; and the biggest driver of motivation is **[3]** wins (the Progress Principle), so keep a daily progress **[4]**.

Q6 · SINGLE MCQ**LECTURE 2**

According to Young, an idea is fundamentally:

- ☐ a A gift given only to the talented
- ☐ b A new combination of existing elements, found by seeing relationships
- ☐ c The result of working harder than everyone else
- ☐ d Something that cannot be produced by any process

Q7 · MATCHING**LECTURE 2**

Match each Thinking Hat to its focus.

HAT	FOCUS
White	?
Black	?
Green	?
Blue	?

Options: caution; process; facts; creativity.

Q8 · MULTIPLE RESPONSE**LECTURE 2**

Which statements about fear and creativity match the lecture? (Select all that apply.)

- ☐ a Fear neurologically suppresses the prefrontal cortex
- ☐ b Fear and faith cannot coexist
- ☐ c Fear should be passively accepted and waited out
- ☐ d Fear is a cognitive stance to be dismantled by deliberate replacement

Q9 · TRUE / FALSE**LECTURE 2**

The W.I.S.E. Model is a cycle to inhabit continuously, not a sequence you complete once.

True / False

Q10 · CLOZE**LECTURE 2**

On the Knowledge-Wisdom Ladder, rung one is **[1]**, rung two is **[2]**, and rung three is **[3]**, which most people never reach. Knowledge gives power; wisdom gives **[4]**.

Q11 · SINGLE MCQ**LECTURE 3**

"Companies don't compete in the marketplace; they compete in the minds of consumers." Who said it, and what does it teach about you?

- ☐ a Jeff Bezos; that your brand is your logo
- ☐ b Al Ries and Jack Trout; that you compete for mindshare, not just jobs
- ☐ c Norman Vincent Peale; that positive thinking wins jobs
- ☐ d Peter Gollwitzer; that intentions beat plans

Q12 · MATCHING**LECTURE 3**

Match each packaging level to its description.

LEVEL	DESCRIPTION
Personal Presentation	?
Professional Documentation	?
Digital Presence	?

Options: your CV as a curated narrative where every line earns its place; how you dress, carry yourself and occupy a room; what recruiters find when they search you before meeting you.

Q13 · MULTIPLE RESPONSE**LECTURE 3**

Which were Adaeze's four brand pillars? (Select all that apply.)

- ☐ a Design Thinking
- ☐ b Social Impact
- ☐ c Maximum Availability
- ☐ d Tech for Good

Q14 · TRUE / FALSE**LECTURE 3**

Authenticity is integration: when private and public align and words, actions and values are the same person, producing trustworthiness that no strategy can manufacture.

True / False

Q15 · CLOZE**LECTURE 3**

On mentors: they compress **[1]** and shortcut costly mistakes; to attract one, demonstrate you are already **[2]**; do not wait to be assigned one, **[3]** one; and the worst they can say is **[4]**.

Q16 · SINGLE MCQ**LECTURE 4**

"Necessity is the mother of Invention, and Invention is the mother of ____." Which word completes it?

- ☐ (a) Distinction
- ☐ (b) Retirement
- ☐ (c) Comfort
- ☐ (d) Popularity

Q17 · MATCHING**LECTURE 4**

Match each Kit number to its name.

KIT	NAME
Kit 1	?
Kit 3	?
Kit 5	?
Kit 7	?

Options: Timing; Task; Tarrying; Target.

Q18 · MULTIPLE RESPONSE**LECTURE 4**

Which describe Kit 6, Tillage, correctly? (Select all that apply.)

- ☐ (a) It is disciplined, planned labour, not random activity
- ☐ (b) You should prepare in advance, as a winner prepares a full month's messages before the month begins
- ☐ (c) You should wait for perfect conditions before starting
- ☐ (d) Create work for yourself; do not wait for work to find you

Q19 · TRUE / FALSE**LECTURE 4**

Timing has two edges, starting too early and waiting too long, and both are failures of discernment.

True / False

Q20 · CLOZE**LECTURE 4**

Kit 7 is Tarrying. God runs a **[1]** Calendar: when you are due, He will not deny you. Jericho: Israel marched for **[2]** days and nothing happened; on the **[3]** day the walls fell, same process, different **[4]**.

Q21 · SINGLE MCQ**LECTURE 5**

Joseph told his dream and it caused immediate trouble. What does Strategy 4 draw from that?

- ☐ a That a dream should be kept private until it is fulfilled
- ☐ b That the trouble led to Egypt and Egypt led to the palace, so the telling was the first step to the fulfilling
- ☐ c That dreams should be shared only with those who already agree with you
- ☐ d That the trouble delayed a fulfilment that would otherwise have come sooner

Q22 · MATCHING**LECTURE 5**

Match each step of the 7-Step Personal Success Plan to its action.

STEP	ACTION
Purpose	?
Planning	?
Programming	?
Appraisal	?

Options: block time on your calendar; write your one-sentence mission; review every semester honestly; map your 4-year milestones.

Q23 · MULTIPLE RESPONSE**LECTURE 5**

Which describe a Vision rather than a Dream? (Select all that apply.)

- ☐ a Specific and purposeful
- ☐ b About what you are called to do
- ☐ c Fades under pressure
- ☐ d Need-meeting

Q24 · TRUE / FALSE**LECTURE 5**

Before the presidency Lincoln failed in business twice, lost legislative races repeatedly and was widely dismissed as a political failure, and he was then elected the 16th President of the United States.

True / False

Q25 · CLOZE**LECTURE 5**

Pillar 3 is Hard Work. Alexander Kroll wanted to play football but had the wrong physical build, so he woke at **[1]** every night to train and earned his place on the team. Research from Dr. Gail Matthews adds that people who write goals and share them with an accountability partner are **[2]** more likely to achieve them. The course closes on compounding: **[3]** better every day makes you **[4]** better in a year.

Answers

One mark each. If you cleared this cold, you are ready for the real thing.

Q1 TO Q5 · LECTURE 1

Q1

a. An Objective (one bold, qualitative statement) plus 2 to 4 measurable Key Results that prove it.

Q2

a and b. The added letters are Exciting (internal fuel) and Reviewed (a scheduled progress check). c and d invent false meanings.

Q3

Life Vision = 10 to 20 years; Strategic Goals = 1 to 3 years; Quarterly Targets = 12 weeks; Weekly Actions = 7 days.

Q4

True.

Q5

[1] 51% (+51%), [2] 95%, [3] small, [4] journal.

Q6 TO Q10 · LECTURE 2

Q6

b. An idea is a new combination of existing elements, found by seeing relationships between things that appear unrelated.

Q7

White = facts; Black = caution; Green = creativity; Blue = process. (Red = emotion, Yellow = optimism.)

Q8

a, b and d. Fear is dismantled by deliberate replacement, not passively accepted, so c is false.

Q9

True.

Q10

[1] Information, [2] Knowledge, [3] Wisdom, [4] strength.

Q11 TO Q15 · LECTURE 3

Q11

b. Al Ries and Jack Trout; you compete for mindshare, not just jobs.

Q12

Personal Presentation = how you dress, carry yourself and occupy a room; Professional Documentation = your CV as a curated narrative where every line earns its place; Digital Presence = what recruiters find when they search you.

Q13

a, b and d. Adaeze's pillars were Design Thinking, Social Impact, Communication, and Tech for Good. "Maximum Availability" is the generalist's trap.

Q14

True.

Q15

[1] timelines, [2] in motion, [3] pursue, [4] no.

Q16 TO Q20 · LECTURE 4

Q16

a. Distinction. Necessity to Invention to Distinction.

Q17

Kit 1 = Task; Kit 3 = Target; Kit 5 = Timing; Kit 7 = Tarrying. (Full order: Task, Training, Target, Tools, Timing, Tillage, Tarrying.)

Q18

a, b and d. Tillage does not wait for perfect conditions, so c is wrong.

Q19

True.

Q20

[1] Due-season, [2] six, [3] seventh, [4] timing.

Q21

b. The trouble was the route, not the cost. Option a states the exact reverse of the strategy's headline: a closed mouth is a closed future.

Q22

Purpose = write your one-sentence mission; Planning = map your 4-year milestones; Programming = block time on your calendar; Appraisal = review every semester honestly. (The full seven: Purpose, Planning, Programming, Pursuit, Appraisal, Perseverance, Receive.)

Q23

a, b and d. "Fades under pressure" is the Dream; the Vision *anchors* you under pressure.

Q24

True. All four setbacks are on the slide, and he became arguably the greatest president in American history.

Q25

[1] 2:30 a.m., [2] 76%, [3] 1%, [4] 37 times (37x).

RAPID RECALL

The Master Cram Sheet

Everything the test rewards, on a few pages. Read this last, the night before. If a line here is not instant, go back to its module.

Lecture 1: Goal Setting

- ▶ **Four levels:** Wish (no direction), Dream (indefinite), Intention (no measure), Goal (specific, measurable, time-bound). Shift from "I want" to "I will, by [date], measured by [evidence]."
- ▶ **Three goal types:** Outcome (what you achieve, outside daily control), Process (what you do, the daily engine), Identity (who you become, behaviour follows without negotiation).
- ▶ **Four frameworks and the failure each fixes:** SMART+ER (no structure/emotion), OKRs (no measurable evidence), 12-Week Year (annual planning kills urgency), Implementation Intentions (no trigger to act).
- ▶ **SMART+ER:** Specific, Measurable, Achievable, Relevant, Time-bound, plus Exciting and Reviewed.
- ▶ **OKR:** one qualitative Objective + 2 to 4 measurable Key Results. A Key Result is not an activity. Adaeze scored 0.75 on posts (9 of 12), 0.5 on mentors (1 of 2), overall 0.76 (Strong).
- ▶ **12-Week Year (Brian Moran):** Vision, 12-Week Goal, Weekly Plan, Weekly Scorecard (target 85%+), Weekly Review. Short cycles keep urgency active.
- ▶ **Implementation Intentions (Gollwitzer):** "When [concrete cue], I will [behaviour]." Cue = time/place/completed action, never emotional. 71% follow-through vs 32%.
- ▶ **Three reasons goals fail:** Planning Fallacy (add 40% buffer), Motivation Decay (weeks 3 to 8), Willpower Depletion (design environment). None is laziness.
- ▶ **Six strategies:** Habit Stacking, Temptation Bundling (+51%), 2-Minute Rule, Progress Principle (small wins), Accountability (95%), WOOP (Wish, Outcome, Obstacle, Plan; mental contrasting).
- ▶ **Total Man dimensions:** Spiritual, Mental, Physical, Social, Financial.
- ▶ **4-Layer Goal Stack:** Life Vision (10 to 20 yrs), Strategic Goals (1 to 3 yrs), Quarterly Targets (12 wks), Weekly Actions (7 days).

Lecture 2: Positive Thinking and the W.I.S.E. Model

- ▶ **Five authors and books:** Oyedepo (Winning Wisdom), Leaf (Switch On Your Brain), Peale (The Power of Positive Thinking), de Bono (Lateral Thinking), Young (A Technique for Producing Ideas).
- ▶ **W.I.S.E.:** Wisdom (Oyedepo, seek the source), Inner Architecture (Leaf, prepare the receiver), Spirit of Possibility (Peale, fuel the engine), Execution (de Bono + Young). A cycle, not a one-time sequence.
- ▶ **Knowledge-Wisdom Ladder:** Information, Knowledge, Wisdom (applying knowledge to results). Knowledge = power; wisdom = strength.
- ▶ **SWITCH Protocol (21-day, builds new neural structures):** Gather, Focused Reflection, Write, Revisit, Active Reach, Celebrate. Not affirmations.
- ▶ **Fear:** suppresses the prefrontal cortex (creative centre); fear and faith cannot coexist; fear is replaced, not managed.
- ▶ **de Bono's four tools:** Random Entry, Provocative Operation (Po), Challenge Assumptions, Six Thinking Hats (White facts, Red emotion, Black caution, Yellow optimism, Green creativity, Blue process).
- ▶ **Young:** an idea is a new combination of existing elements. Five steps: Gather, Digest, Drop, Eureka, Develop.

Lecture 3: Personal Branding

- ▶ Your brand is what people say when you are not in the room (Bezos). Silence is invisibility, not neutrality.
- ▶ **Clean the inside first.** Three dimensions of inner brand: Clarify Values, Character Consistency, Competence Depth.
- ▶ **Self-Audit:** do well = zone of strength; care about = brand energy; others say = external reality; want to go = strategic direction. Ask 3 people for "three words."
- ▶ **Packaging (translation, not deception), three levels:** Personal Presentation, Professional Documentation, Digital Presence.
- ▶ **Positioning:** compete for Mindshare, not jobs (Ries and Trout). Chain: Depth of Focus, Distinction, Recall, Opportunity. Known for five = memorable for none.
- ▶ **Niche** is a launch pad, not a limitation. Specialist = sought after; generalist = available.
- ▶ **Brand Bank Account:** deposits (excellence, integrity, fulfilled promises, showing up); withdrawals (unreliability, poor output, public negativity, treating "unimportant" people poorly). Greatest threat = invisibility.
- ▶ **Authenticity = integration**, producing trustworthiness. Networking = cultivating mutually beneficial relationships.

Lecture 4: Systems, the 7 Kits

- ▶ **System** = parts working together to deliver a guaranteed result. Hard work without a system = engine with no transmission.
- ▶ **The 7 Kits (all T):** Task (bound?), Training (equipped?), Target (aimed?), Tools (armed?), Timing (season?), Tillage (working?), Tarrying (waiting?).
- ▶ **Task:** see it as necessity. Necessity to Invention to Distinction. Attempt ("let me try", retreat, dies at resistance) vs Task ("this must work", no retreat, outlasts opposition).
- ▶ **Training:** Formal sets the pace; Informal (personal development) delivers the goods. Training determines placement.
- ▶ **Target** must be Specific, Defined, Quantifiable, Yours. No goalpost, no game; run with the tape.
- ▶ **Tools:** without them it is war without arms; acquire them no matter the cost. Spanner (right tool for the job), King (consult and prepare, Luke 14:31). Equip the hand before the harvest.
- ▶ **Timing:** two edges, too early and too long. Right timing is a major asset; until ripe, do not step out.
- ▶ **Tillage:** quality of labour decides the future; disciplined, planned labour; prepare in advance; create work, do not wait for it.
- ▶ **Tarrying:** Due-season Calendar; gestation period; the wall falls at the 50th blow; Jericho fell on the seventh day. Do not stop.

Lecture 5: Overcoming Discouragement

- ▶ **Discouragement** = the gradual withdrawal of the courage to continue (the slow leak). Shows up as academic pressure, social comparison, financial constraints, career uncertainty, failure.
- ▶ **The real enemy is your response.** Wrong: surrender, define yourself by the fall, stop at the 49th blow. Right: endure, rise every time, deliver the 50th. Seven falls is not disgrace; staying on the floor is (Pro 24:16).

- ▶ **Grit = Passion + Long-term Perseverance** (Duckworth). The **only** consistent predictor. NOT IQ, NOT talent, NOT social class. Studied West Point cadets, spelling bee champions, top entrepreneurs.
- ▶ **The 50th Blow / Sledgehammer:** blow 10, 30, 49 = nothing; blow 50 = collapse. It was **not** the 50th, it was the cumulative force of ALL before it. Don't stop at 49.
- ▶ **Vision gives three things:** Direction (where), Motivation (why), Endurance (withstand pain when the destination is worth it). "Where there is no vision, the people perish" (Pro 29:18).
- ▶ **Dream against Vision:** vague / specific and purposeful; what you want / what you are called to do; fades under pressure / anchors under pressure; self-centred / need-meeting. Vision = discovery of God's plan, your mission on earth.
- ▶ **Three discovery questions:** What problem breaks your heart? What could you do for free, for life, and still feel fulfilled? At age 70, what would you regret not having done?
- ▶ **Three Pillars:** Vision, Information, Hard Work. **Information without hard work = Frustration. Hard work without vision = Exhaustion. Vision without information = Stagnation.**
- ▶ **The Precision Test:** Specific ("achieve 4.90 GPA", not "do better"), Measurable, Time-bound, **Written** (unwritten = a wish). Write your top 3 goals for the next 12 months.
- ▶ **The 1% Rule:** 20 to 30 min daily of **non-academic** reading = 12 to 18 books/year = 48 to 72 over 4 years. Daniel: relevant under 3 kings for 65 years. Paul: "Bring the books" (2 Tim 4:13).
- ▶ **Alexander Kroll:** wanted to be a footballer, wrong physical build, woke at **2:30 a.m. every night** to train, built the muscles, earned his place. No shortcut; perspiration is the price.
- ▶ **Dweck:** Fixed = "I'm just not smart enough", failure = who I am, avoids challenge. Growth = "I haven't mastered this **yet**", failure = feedback, embraces challenge.
- ▶ **Strategy 1 RESIST** (endurance like a soldier, 2 Tim 2:3). Four truths: attacks hardest in the **middle**; every champion has marks of failure; opposition is proof you are moving; the crown is on the other side of the endurance.
- ▶ **Strategy 2 GUARD YOUR JOY, a weapon, not a luxury.** Joy Stimulants: daily gratitude (write 3 things), forward-looking purpose-driven peer group, regular service to others.
- ▶ **Strategy 3 PERSEVERE**, Lincoln: failed in business twice, lost legislative races repeatedly, personal tragedies, dismissed as a political failure, then **16th President**. Your setback is not your final chapter.
- ▶ **Strategy 4 SPEAK YOUR DREAM**, a closed mouth is a closed future. Joseph: telling caused trouble, trouble led to Egypt, Egypt led to the palace; the telling was the first step to the fulfilling. Write goals and share with an accountability partner = **76%** more likely (Gail Matthews).
- ▶ **7-Step Plan:** Purpose (one-sentence mission), Planning (4-year milestones), Programming (block calendar time), Pursuit (begin today), Appraisal (review every semester), Perseverance (expect setbacks), Receive (do not stop until the crown is yours). "You do not rise to the level of your goals. You fall to the level of your systems" (James Clear).
- ▶ **Conclusion:** small disciplines compounded daily = Extraordinary Results. **1% better every day = 37x better in a year** (Atomic Habits).

⚠ **TRAP**

L1 S15

L5 S17

The two accountability numbers. **95%** is Lecture 1: goal completion with an accountability partner and regular check-ins. **76%** is Lecture 5: more likely to achieve, for those who **write** goals **and share** them with an accountability partner (Gail Matthews). Read the lecture tag on the question, then give that lecture's number.

● **MUST MEMORISE**

THE ONE RULE

Every question rewards the exact slide distinction over general good sense. A Key Result is not an activity; fear is replaced not managed; a niche is a launch pad not a limitation; a cue is concrete not emotional; a vision is not just a bigger dream; the 50th blow gets the credit but all 49 did the work; success needs Task, Training, Target, Tools, Timing, Tillage, Tarrying.

◆ **MEMORY HOOK: ANSWER THE SLIDE, NOT YOUR INSTINCT.**
